This report is submitted for the general information of the shareholders of Waddell & Reed Advisors Funds. It is not authorized for distribution to prospective investors in the Funds unless preceded or accompanied by a current Waddell & Reed Advisors Funds prospectus, or summary prospectus, if available, and current performance information, including current Lipper ranking information.

Henry J. Herrmann, CFA

Dear Shareholder:

Over the last 12 months, investors have witnessed some dramatic changes that began shortly before our last report to you. In March 2009, several government programs were implemented to stabilize the economy and financial markets, which were then teetering on the edge of collapse. These programs included a housing rescue plan, the purchase of Treasuries and mortgage-backed securities in the open market and the acquisition of toxic real estate assets from banks. In all, the total package amounted to in excess of \$1 trillion. In addition, short-term interest rates were reduced to essentially zero, where they remain. These aggressive efforts, and similar policies implemented in many foreign markets, engendered a sharp rally in financial markets in the second half of 2009 and into 2010. The initiatives put in place had the hoped-for effect. By the third calendar quarter of 2009, gross domestic product expanded at a 2.28 percent annualized rate. In the fourth quarter, gross domestic product expanded to 5.6 percent.

The momentum continued into the first quarter of 2010, albeit at a slower pace. Economic indicators are pointing to continued recovery and less volatility. Also, investor confidence was further bolstered by stabilization of global credit markets and strongerthan-expected first- and second-quarter 2010 corporate profits. Recently, however, this optimism abruptly has changed with the emergence of the European debt crisis, which created fears of a double-dip recession. The European banking system was negatively impacted when investors began to question the credit quality of several sovereign governments, and whether the Eurozone would be able to move past political strife to gain monetary stability. That scenario, in conjunction with data reflecting slower U.S. economic growth in the second quarter and escalating concern about China's ability to slow the pace of its economy, drove a sharp global correction during the final quarter of the fiscal period. Nonetheless, U.S. markets closed the fiscal year ended June 30, 2010 with gains. The S&P 500 Index gained 14.43 percent during the 12-month period. Fixedincome markets, as measured by the Citigroup Broad Investment Grade Index, increased 9.03 percent for the year.

Numerous challenges remain, including persistent high unemployment and a housing sector that continues to struggle, particularly so after government stimulus expired in the second calendar quarter of 2010. Longer term, we are optimistic that better days are ahead. Interest rates are low, government policy remains accommodative, companies are reporting more robust

activity and job creation seems to be developing slowly. The economy in the first calendar quarter expanded at a 2.7 percent rate, and preliminary numbers for second-quarter growth appear positive. Corporate profits in the first half of 2010 expanded sharply, creating a backdrop that should translate into a higher stock market, as my belief continues to be that stock prices follow earnings.

Economic Snapshot

	6/30/10	6/30/09
S&P 500 Index	1030.71	919.32
MSCI EAFE Index	1348.11	1307.16
Citigroup Broad Investment Grade Index (annualized yield to maturity)	2.62%	3.70%
U.S. unemployment rate	9.5%	9.5%
30-year fixed mortgage rate	4.74%	5.25%
Oil price per barrel	\$75.63	\$69.82

Sources: Bloomberg, U.S. Department of Labor

All government statistics shown are subject to periodic revision. The S&P 500 Index is an unmanaged index that tracks the stocks of 500 primarily large-cap U.S. companies. MSCI EAFE Index is an unmanaged index comprised of securities that represent the securities markets in Europe, Australasia and the Far East. Citigroup Broad Investment Grade Index is an unmanaged index comprised of securities that represent the bond market. Annualized yield to maturity is the rate of return anticipated on a bond if it is held until the maturity date. It is not possible to invest directly in any of these indexes. Mortgage rates shown reflect the average rate on a conventional loan with a 60-day lender commitment. Oil prices reflect the market price of West Texas intermediate grade crude.

As always, we thank you for your continued trust in Waddell & Reed, and encourage you to share in our optimism for the future.

Respectfully,

Henry J. Herrmann, CFA

Henry J. Herrman

President

The opinions expressed in this letter are those of the President of Waddell & Reed Advisors Funds and are current only through the end of the period of the report, as stated on the cover. The President's views are subject to change at any time, based on market and other conditions, and no forecasts can be guaranteed.

Below, Barry M. Ogden, CFA, CPA, portfolio manager of the Waddell & Reed Advisors Accumulative Fund, discusses positioning, performance and results for the fiscal year ended June 30, 2010. Mr. Ogden has managed the fund for six years and has 16 years of industry experience.

Barry M. Ogden

Fiscal year Performance

For the 12 Months Ended June 30, 2010	
Accumulative Fund (Class A shares at net asset value)	9.66%
Benchmark(s) and/or Lipper Category	
S&P 500 Index (generally reflects the performance of large and medium-size U.S. stocks)	14.43%
Lipper Multi-Cap Core Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	15.15%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

A volatile year

The year ended June 30, 2010, proved to be one of dramatic change in the investment markets. When the Fund's fiscal year began, the U.S. economy was in the very early stages of recovery. Beginning in March 2009, shortly before our last report to you, markets around the world began to rally impressively after governments stepped in with stimulus packages to shore up economies and create liquidity. As conditions improved, investors rediscovered their appetite for risk, demonstrating a preference for lower-quality or less financially secure businesses. This drove a low-quality rally of those businesses that had declined the most in the credit crisis. By mid-2009, the start of the Fund's fiscal year, news of improving earnings and better consumer sentiment about the global economic outlook bolstered equities. United States gross domestic product registered growth in the third quarter for the first time in more than a year, while the final quarter of 2009 saw a broad-based advance, with all sectors recording gains and many economic indicators improving, suggesting that the recovery may be moving toward sustainability. Also notable during the fourth quarter was the global response to the debt default by Dubai World, a state-owned development company in the United Arab Emirates. This event served as a harsh reminder that while the credit crisis may have faded from the forefront of investors' minds, it clearly was not over. It also reignited concern about the economic challenges facing some of the weakest European countries, particularly Greece, which only intensified later in the

The momentum that drove the equity markets higher the second half of 2009 continued into the first quarter of 2010, but at a much slower pace, with investors lacking confidence and

becoming increasingly cautious. This is due in part to events taking place in several emerging markets. China began to tighten credit in an effort to slow down its perhaps too-rapidly-growing economy and stave off inflation. The final quarter of the Fund's fiscal year was particularly volatile for U.S. equities. Among the largest factors impacting market performance were intensifying concerns that Europe would lead the world into the second global recession in three years or at least spur a double-dip recession and growing concerns about slowing economic growth in China. The U.S. economy also remains a top concern for investors, as the U.S. unemployment rate currently hovers near 10 percent, and the beleaguered housing sector continues to struggle, particularly so after government stimulus was removed in the second quarter. Another major event impacting the market was the April 21 oil rig explosion and subsequent massive oil spill in the Gulf of Mexico, which continues to generate ominous headlines on a daily basis. These and other factors collectively have weighed on investor confidence. As one would expect in such an environment, and with little on the horizon generating hope, investors have experienced a crisis in confidence, remaining largely on the sidelines and waiting for direction.

Portfolio changes throughout the fiscal year

We started this fiscal year very defensive and on our heels due to the economic malaise that we were dealing with in early 2009. We finished the June 30 period with a significant amount of cash, but were uncertain if that would be enough to stave off a further downslide in the equity markets. As things gradually stabilized and the clouds slowly dissipated, we put a little more cash back to work, while still being cautious about the possibility of a double-dip recession, which likely would have taken us back to the lows set in early March 2009. Fortunately, the double-dip recession did not materialize, the markets stabilized and the equity markets continued to march higher during the third quarter of 2009. We also became more confident in the economic environment and corporate profit picture and put more cash to work during the quarter, finishing the quarter with just a little more than 4 percent on the sidelines. As the fourth quarter unfolded, the internal battle we were dealing with was trying to gauge how much of the good news was already priced into the equity markets. By the end of 2009, we had built back up a buffer of cash, just under 11 percent. Our position had moved from more optimistic to one in which we were a little concerned with how far and how fast the broader

equity markets had moved off their lows in March 2009. We felt a pullback or consolidation in the markets was needed and would look for that opportunity to put more money back to work. As the broader markets contracted in mid January and early February, we found opportunities to put some cash to work, and we finished the first quarter with about 2.5 percent cash.

With the unprecedented disaster in the Gulf of Mexico, our investment in Transocean Inc. hurt the Fund's performance, especially in the quarter ending June 30. As the situation worsened, the market punished all companies that had anything to do with the spill and Transocean was no different. Headlines will persist for quite some time, but we believe we are past the pinnacle of headline risk and, longer term, we see inherent value in the shares.

The Fund's underweight position within financials also hurt performance for the year, especially off the bounce in March 2009. We gradually built up the Fund's exposure to the sector, but unfortunately we weren't fast enough to adjust to the improving economic backdrop and subsequent spike in equity prices within this sector.

The same can be said for the Fund's early-year exposure to the consumer. Consumer discretionary was one of the better performing sectors for the early part of the year, and unfortunately we did not anticipate the consumer being quite as resilient as they were. Some of our names within this space were significant positive contributors to the Fund, but we simply did not have enough exposure to the space when the sector was outperforming. Our investment philosophy and strategy remain focused on owning companies that we believe can grow their business, generate high returns, take market share and are not dependent on capital markets to fund their growth.

Our outlook for the rest of the year

As we look forward to the rest of 2010, several things deserve special attention by investors. Probably the most important, given the current run in the equity markets, is the ongoing turnaround in the job environment. In March of 2010 it was reported the United States added 162,000 jobs, a touch below the ever-rising whisper numbers, but regardless, it was the best number since March 2007, when we added 239,000 workers. With job security, we believe it is likely that the average consumer will start to spend and help sustain the current momentum we have experienced to date. Up to now, the labor markets have been rather subdued and disappointing. We suspect, however, that we will witness an improved labor market for the rest of 2010 and into 2011, as corporations realize they are understaffed relative to an improving demand environment. If this does not materialize, we will rethink our position for continued positive equity returns for the remainder of the year. Another critical variable to track is the housing market and continued stabilization and working off of excess inventory. Housing inventory is gradually coming down, and although we're not at equilibrium at this point, directionally, we're making strides. Over the remainder of 2010, assuming mortgage rates don't spike, we should continue to move towards a scenario in which housing prices could gradually start to improve in some markets.

Earnings upside expected for remainder of 2010

We've witnessed significant earnings revisions throughout 2009 and in the first half of 2010, as corporations did an exceptional job of pulling in costs during the downturn and aggressively rightsizing their companies for the slowdown that was developing during the back half of 2008 and into 2009. In the latter half of 2009, profits surprised in many cases, despite anemic top-line growth for most companies and industries. Thus far into 2010, we're seeing a resurgence in domestic and global gross domestic product, and we believe we should see an improvement in the top-line revenue growth of many of our holdings. We believe this should drive operating leverage, margin expansion and ultimately, earnings beats for the rest of 2010. The street still has not caught up fully with where earnings are likely to go, but there is no doubt they are getting closer. As we approach second-quarter earnings and quarterly updates by the companies, we should get a much better look into just how close reality and expectations have gotten. It's possible we might get some modest pullback for equities during earnings season as expectations have clearly moved up, but longer term, we believe the stage has likely been set for positive returns in the equity markets for the remainder of 2010.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Accumulative Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Accumulative Fund (UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	3.36%	4.32%	8.45%	9.87%
5-year period ended 6-30-10	-1.99%	-2.13%	-1.85%	-0.57%
10-year period ended 6-30-10	-1.20%	-1.71%	-1.62%	-0.36%

(2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no quarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

DISCLOSURE OF EXPENSES Waddell & Reed Advisors Funds

As a shareholder of a Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments, redemption fees and exchange fees; and (2) ongoing costs, including management fees, distribution and service fees, and other Fund expenses. The Illustration of Fund Expenses for each fund is intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds. Each example is based on an investment of \$1,000 invested at the beginning of the period and held for the six-month period ended June 30, 2010.

Actual Expenses

The first line for each share class in each table provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, a \$7,500 account value divided by \$1,000 = 7.5), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. There may be additional fees charged to holders of certain accounts that are not included in the expenses shown in the tables. These fees apply to Individual Retirement Accounts (IRAs), IRA Rollovers, Roth IRAs, Conversion Roth IRAs, Simplified Employee Pension (SEP), Simple IRAs, Tax-Sheltered Accounts (TSAs), Keogh Plans, Owner Only 401(k) (Exclusive K) Plans and Final Pay Plans. As of the close of the six months covered by the tables, a customer is charged an annual fee of \$15 within each plan type. This fee is waived for IRA Rollovers and Conversion Roth IRAs if the customer owns another type of IRA. Coverdell Education Savings Account plans are charged an annual fee of \$10 per customer. You should consider the additional fees that were charged to your Fund account over the six-month period when you estimate the total ongoing expenses paid over the period and the impact of these fees on your ending account value as such additional expenses are not reflected in the information provided in the expense tables. Additional fees have the effect of reducing investment returns.

Hypothetical Example for Comparison Purposes

The second line for each share class in each table provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of five percent per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this five percent hypothetical example with the five percent hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the tables are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees or exchange fees. Therefore, the second line of each share class in the tables is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

For the Six Months Ended June 30, 2010 Based on Actual Fund Return ⁽¹⁾	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Class A	\$1,000	\$ 915.10	1.17%	\$ 5.55
Class B	\$1,000	\$ 910.10	2.34%	\$11.08
Class C	\$1,000	\$ 910.90	2.20%	\$10.41
Class Y	\$1,000	\$ 916.70	0.86%	\$ 4.12
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,018.99	1.17%	\$ 5.86
Class B	\$1,000	\$1,013.18	2.34%	\$11.68
Class C	\$1,000	\$1,013.86	2.20%	\$10.98
Class Y	\$1,000	\$1,020.54	0.86%	\$ 4.34

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾ This section uses the Fund's actual total return and actual Fund expenses. It is a quide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Fiscal year Performance

Asset Strategy Fund (Class A shares at net asset value)	8.23%
Benchmark(s) and/or Lipper Category	
S&P 500 Index (generally reflects the performance of large and medium-size U.S. stocks)	14.43%
Citigroup Broad Investment Grade Index (generally reflects the performance of the bond market)	9.03%
Citigroup Short-Term Index for 1 Month Certificates of Deposit (generally reflects cash)	0.22%
Lipper Global Flexible Portfolio Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	10.72%

Note: The Fund's Lipper Category changed from the Flexible Portfolio Funds Universe Average to the Global Flexible Portfolio Funds Universe Average effective March 1, 2010.

Multiple indexes are shown because the Fund invests in multiple asset classes.

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

A volatile year

The fiscal year ended June 30, 2010, proved to be one of dramatic change in the investment markets. When the Fund's fiscal year began, the U.S. economy was in the very early stages of recovery. Beginning in March 2009, shortly before our last report to you, markets around the world began to rally impressively after governments swooped in with stimulus packages to shore up economies and create liquidity. As conditions improved, investors rediscovered their appetite for risk, demonstrating a preference for lower-quality or less financially secure businesses. This drove a low-quality rally that ultimately drove up the prices of those businesses that had declined the most in the credit crisis. By mid-2009, the start of the Fund's fiscal year, news of improving earnings and better consumer sentiment about the global economic outlook bolstered equities. U.S. gross domestic product registered growth in the third calendar quarter of 2009 for the first time in more than a year, while the final calendar quarter of 2009 saw a broad-based advance, with all sectors recording gains and many economic indicators improving, suggesting that continued recovery may be moving toward sustainability. Also notable during the fourth quarter was the global response to the debt default by Dubai World, a state-owned development company in the United Arab Emirates. This event served as a harsh reminder

that while the credit crisis may have faded from the forefront of investors' minds, it clearly was not over. It also reignited concern about the economic challenges facing some of the weakest European countries, particularly Greece, which only intensified later in the fiscal period.

The momentum that drove the equity markets higher in the second half of 2009 continued into the first calendar quarter of 2010, albeit at a markedly slower pace. Although many economic indicators pointed to continued recovery and increasing stability in the U.S. economy, domestic equities spent the bulk of early 2010 searching for direction. Among the largest factors impacting market performance were intensifying concerns that Europe would lead the world into the second global recession in three years, and growing concerns about slowing economic growth in China and other emerging markets, which now are in the early stages of a tightening cycle. The Chinese are clamping down on both the property and banking sectors in an effort to slow economic growth; the central bank in India raised rates in an effort to slow their economic growth, and we're expecting the Brazilians will raise rates soon as well. As a result, the second calendar quarter of 2010 was particularly volatile for U.S. equities.

The U.S. economy also remains a top concern for investors as recovery slowed perceptibly during the first six months of 2010, and especially in the final three months of the fiscal period. The U.S. unemployment rate currently is approximately 9.5 percent, and the beleaguered housing sector continues to struggle, particularly so after government stimulus was removed in the second calendar quarter of 2010, which additionally restrained performance. Another major event impacting the market was the April 20 oil rig explosion and subsequent massive oil spill in the Gulf of Mexico, which generated ominous headlines on a daily basis. As one would expect in such an environment, and with little on the horizon generating hope, investors have experienced a crisis in confidence, remaining largely on the sidelines and waiting for direction.

A responsive, yet steadfast approach

We entered the fiscal year cautious and with a somewhat defensive posture. As the period progressed and investor confidence grew, we began reducing fixed income holdings and increased allocations into those equities we believed were likely to benefit from continued economic recovery in China. We favored banks, insurance companies and consumer/industrial

companies we felt were likely to benefit from China's stimulus actions. It was a strategy that worked well for the Fund, as a number of these securities emerged as top contributors, particularly during the latter half of 2009. In general, we believe China's stimulus programs are likely to be effective. Asian consumers not only have healthy balance sheets, but are also enjoying rising incomes. We think they're more likely than not to increase their use of financial leverage over time.

The second half of calendar 2009 was largely positive. The equity portion of the Fund, which remained focused on the emerging middle class, was the primary driver of gains. We maintained a low fixed-income weighting and continued to reduce the Fund's cash position. Sectors in which the Fund was most heavily concentrated included consumer discretionary, financials and information technology, on the premise that they offer the greatest potential, despite a de-leveraging cycle on the part of the consumer.

Catalysts for change

At least two events worth noting occurred in the final calendar quarter of 2009. The most important of those, in our view, was the evolving strength of the dollar. This was driven by improving investor sentiment, along with the tendency for investment managers and investors who did well in 2009, particularly outside the United States, to rebalance their portfolios at year end and bring those profits home. This created a bit of a headwind for the Fund due to its hefty stake in gold bullion. The other event was the global response to the debt default in Dubai. The event, which initially shook global markets, served both as a harsh reminder that though the credit crisis may be forgotten, it's not gone, and reignited concerns about the economic dire straits facing some of the weakest European countries.

Those concerns intensified during the first calendar quarter of 2010, prompting us to restructure the Fund to manage risk and preserve capital. Our primary concerns surround valuation in emerging markets, which were looking expensive to us. Not having valuation as a tailwind has led to a steep downdraft in those markets. In response, we reduced the Fund's net equity exposure substantially, hedging downside risk through index futures instead of selling assets we deem to have long-term value. The preponderance of our futures positions are outside the U.S. markets, given our long-held global rebalancing theme. These index futures are highly liquid, which enables us to make or change positions quickly. They're also valued and cash-settled on a daily basis, thereby limiting third-party risk. We created a mix of futures contracts that match the Fund's underlying holdings.

Nonetheless, the Fund's performance during the second half of its fiscal year trailed that of the broader market as represented by the S&P 500 Index. This was largely due to the Fund's exposure to Chinese cyclicals, which were negatively impacted when, to our surprise, the Chinese authorities took a hammer to the property market in April. That caused a fairly big downdraft in

the Chinese market and the Fund's exposure suffered accordingly.

The Fund benefited greatly in the first half of its fiscal year from its heavy stake in gold bullion, which has remained steady at around 10 to 15 percent of assets. We may pare this stake down a bit, due to the extent that the market in general is on board with the notion of gold as a currency play. In addition, when people are concerned about sovereign credit, the dollar has often become more attractive, a trend we witnessed in late 2009 and one we expect will continue. With respect to fixed income, although these products have outperformed equities over the last decade, we don't believe this trend to be sustainable. Equities simply look more attractive to us, and we do not anticipate any major near-term moves into fixed income.

A volatile year, credit concerns persist

We believe the markets will continue to be volatile in the months ahead. What we witnessed was a crisis of confidence, and although the global economic picture is brighter than it was 18 months ago, investors remain very cautious. A tremendous amount of debt remains; it's just been absorbed by governments that injected massive fiscal stimulus to create liquidity. We are now encountering an environment in which volatility is punctuated by concern about what policy makers are doing and what outcomes that may drive.

On a more positive note, despite the heightened volatility of recent months, global growth rebalancing continues. The growth in emerging markets continues fairly unabated on an economic basis. We've been encouraged to see that economic numbers in places like China, India, Brazil, Russia and Southeast Asia have all stayed fairly robust. We continue to see those economies, specifically China, gearing toward consumption as opposed to export. Against this backdrop, we will continue to focus on identifying what we feel are the steady-growth companies that fit our criteria for sustainable competitive advantage. We believe the way to succeed in the next fiscal year is to spend less time on the macro view and more time on micro analysis and individual security selection.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

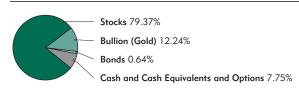

The Fund may allocate from 0–100 percent of its assets between stocks, bonds and short-term instruments, across domestic and foreign securities; therefore, the Fund may invest up to 100 percent of its assets in foreign securities. International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets. With regard to fixed income securities in which the Fund may invest, these are subject to interest rate risk and, as such, the net asset value of the Fund may fall as interest rates rise. Because the Fund may concentrate

its investments, the Fund may experience greater volatility than an investment with greater diversification. The Fund may use short-selling or derivatives to hedge various instruments, for risk management purposes or to increase investment income or gain in the Fund. These techniques involve additional risk. Investing in physical commodities, such as gold, exposes the Fund to other risk considerations such as potentially severe price fluctuations over short periods of time. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Asset Strategy Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Asset Strategy Fund (UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	2.00%	3.17%	7.15%	8.40%
5-year period ended 6-30-10	10.74%	10.95%	11.14%	12.38%
10-year period ended 6-30-10	7.69%	7.38%	7.42%	8.70%

(2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010 Based on Actual Fund Return ⁽¹⁾	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Class A	\$1,000	\$ 922.50	1.17%	\$ 5.58
Class B	\$1,000	\$ 917.40	2.06%	\$ 9.78
Class C	\$1,000	\$ 917.50	1.97%	\$ 9.40
Class Y	\$1,000	\$ 922.70	0.87%	\$ 4.13
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,019.01	1.17%	\$ 5.86
Class B	\$1,000	\$1,014.59	2.06%	\$10.27
Class C	\$1,000	\$1,015.01	1.97%	\$ 9.87
Class Y	\$1,000	\$1,020.50	0.87%	\$ 4.34

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

·				\$ (678.495)	\$54.332

(D)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At June 30, 2010, the total value of these securities amounted to \$187,210 or 6.32% of net assets.

(E)Illiquid restricted security. At June 30, 2010, the Fund owned the following restricted security:

	Acquisition			Market
Security	Date(s)	Shares	Cost	Value
Vietnam Azalea Fund Limited	6-14-07 to 1-28-09	1,100	\$ 7,268	\$5,192

The total value of this security represented approximately 0.18% of net assets at June 30, 2010.

(F)Deemed to be an affiliate due to the Fund owning at least 5% of the voting securities. The Fund and other mutual funds managed by its investment manager, Waddell & Reed Investment Management Company, or other related parties together own 30% of the outstanding shares of this security at June 30, 2010.

(G)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be illiquid under guidelines established by the Board of Trustees. At June 30, 2010, the total value of these securities amounted to \$8,156 or 0.28% of net assets.

(H) Variable rate security. Interest rate disclosed is that which is in effect at June 30, 2010.

(I)Principal amounts are denominated in the indicated foreign currency, where applicable (BRL – Brazilian Real).

(J)Amount shown in principal column represents notional amount for computation of interest.

(K)Rate shown is the yield to maturity at June 30, 2010.

(L)Variable rate security. Interest rate disclosed is that which is in effect at June 30, 2010. Date shown represents the date that the variable rate resets.

Below, Cynthia P. Prince-Fox, portfolio manager of the Waddell & Reed Advisors Continental Income Fund, discusses positioning, performance and results for the fiscal year ended June 30, 2010. She has managed the Fund for 17 years and has 27 years of industry experience.

Cynthia P. Prince-Fox

Fiscal year Performance

Continental Income Fund (Class A shares at net asset value)	11.25%
Benchmark(s) and/or Lipper Category	
S&P 500 Index (generally reflects the performance of large- and medium-sized U.S. stocks)	14.43%
Citigroup Treasury/Govt Sponsored/Credit Index (generally reflects the performance of securities in the bond market)	9.74%
Lipper Mixed-Asset Target Allocation Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	12.88%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

The Fund underperformed its benchmark index, the S&P 500 Index, for the year primarily due to untimely stock selection. Some of this can be explained by lower-quality stocks outperforming higher-quality stocks, which is where the Fund has traditionally been positioned. Additionally, the Fund was overweight traditional defensive sectors such as consumer staples and health care for most of the year. These holdings performed relatively well during the financial crisis, but substantially lagged the rebound in sectors that had been hit the hardest. The Fund's fixed-income holdings were primarily government treasuries and highly rated corporate bonds, both of which underperformed lower-rated bonds for most of the year. In addition, the Fund carried cash early in the year, which was a drag on performance as the markets started to rebound off the March 2009 bottom. As we put cash to work, we remained focused on companies that we felt were well positioned to weather further economic fallout in the event that credit availability remained challenged.

Sources of strength

The Fund's top contributors were in both the consumer staples and discretionary space. The best sector was consumer discretionary, where cosmetics leader The Estee Lauder Companies, Inc. was a top contributor to performance. The company cut costs under new leadership and appears set to benefit from recent signs of an improving operating environment in key areas such as travel retail, emerging markets and restocking/stocking of department store inventories in the United States. Ford Motor Company also had a positive overall

impact on performance. In some ways, Ford Motor Company is symbolic of what corporate America has been dealing with over the past several years: They came into the downturn with a heavily leveraged balance sheet, only to watch the annualized selling rate of automobiles collapse. However, in the same year that we witnessed the near collapse of General Motors Corporation and Chrysler Group LLC, Ford Motor Company turned in a profit for the third quarter of 2009, gained market share and had a marked increase in sales in the final month of the year. Ford was able to produce these results because of aggressive moves to refocus the company to be a world competitor. This will be critical in the globalization race, as China surpassed the United States as the largest car market in the world in 2009

The Fund's largest holding, Apple Inc., was also its single best stock. As we have commented in past commentaries, the rapid growth of new mobile devices is moving beyond the simply "better devices on better networks" of the last two years. For now, Apple's iTunes/AppStore is the dominant mobile applications set, with more than 100,000 applications available.

Some larger laggards

The biggest detractors to performance were in industrials and utilities. The industrial group rallied significantly off the March lows. However, some of the Fund's larger positions underperformed their peers as early cycle plays generally outperformed companies that are exposed to later cycle markets, such as power generation. The Fund's largest utilities holding was Exelon Corporation, which was hit by lower power prices and volumes. We had maintained the position as the company stood to benefit from power price recovery and would have also benefited from passage of federal climate change regulation. We have since sold this holding as neither of those events look to happen in the next year.

We made a number of changes to individual holdings in both the equity and bond portfolios. However, for the majority of the year our allocation remained the same, maintaining a minimum weight of 25 percent in fixed-income securities. Current areas of emphasis remain in industrials, consumer discretionary, technology and consumer staples. The industrial sector represents one of the Fund's largest overweight positions and stands to benefit from a global recovery as many of our holdings are at a competitive advantage to their global counterparts based on certain raw material inputs. Consumer discretionary has been

a strong performer during the Fund's fiscal year, but we are increasingly concerned about the prospect for a more pronounced consumer pullback. The high-end consumer is heavily influenced by net worth expectations (stock market) and the lower-income consumer continues to experience the greatest pressure as unemployment levels have remained stubbornly high. Accordingly, we have recently reduced the Fund's exposure to the consumer. We increased our weight in technology as fundamentals appear to be improving and information technology spending generally should improve with better corporate profit growth. Key underweighted areas include health care and telecom service. The latter is seeing improved demand for services, but faces higher capital intensity over the next year to build out a more robust wireless network to support growing data demand. To this end, we have focused on companies that supply the equipment.

Wall of cash

While we have been climbing a wall of worry in the financial markets, the wall of uncommitted cash that corporations, individuals and institutions have on their balance sheets signifies to us that we still have firepower on the sidelines that can be put to work as confidence increases. The bond market has been the recipient of some of this cash as there have been massive inflows into the fixed income markets over the past five quarters. We would expect some of the cash to find its way into equities, providing further support to the rally. Given this and further evidence that this economy is building on itself have kept us focused on owning companies that we believe will benefit from a cyclical recovery that appears to still be in the early stages.

We anticipate the swell of macro news to remain influential in the short term. However, we don't anticipate making significant changes to either individual holdings or current allocations at this time. We remain more convinced that the companies that have done a good job managing through the downturn will reap the benefits over the current cycle and be in a better position to grow in a low growth environment. We continue to focus where share gains, product innovation and international positioning will likely drive top and bottom line growth. We will continue to make adjustments to the Fund to reflect our most current thinking.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

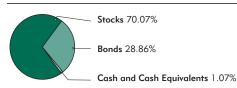

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Continental Income Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Continental Income Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	4.86%	6.07%	10.31%	11.59%
5-year period ended 6-30-10	1.93%	1.96%	2.21%	3.45%
10-year period ended 6-30-10	1.90%	1.51%	1.53%	2.81%

(2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010 Based on Actual Fund Return ⁽¹⁾	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Class A	\$1,000	\$ 972.20	1.25%	\$ 6.11
Class B	\$1,000	\$ 967.80	2.33%	\$11.41
Class C	\$1,000	\$ 969.20	2.18%	\$10.63
Class Y	\$1,000	\$ 973.90	0.91%	\$ 4.44
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,018.60	1.25%	\$ 6.26
Class B	\$1,000	\$1,013.23	2.33%	\$11.68
Class C	\$1,000	\$1,013.99	2.18%	\$10.88
Class Y	\$1,000	\$1,020.29	0.91%	\$ 4.55

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Notes to Schedule of Investments

*Not shown due to rounding.

(A)No dividends were paid during the preceding 12 months.

- (B)Variable rate security. Interest rate disclosed is that which is in effect at June 30, 2010.
- (C)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At June 30, 2010, the total value of these securities amounted to \$13,909 or 2.44% of net assets.
- (D)The interest rate for this security is a stated rate, but the interest payments are determined by multiplying the inflation-adjusted principal by one half of the stated rate for each semiannual interest payment date.
- (E)Rate shown is the yield to maturity at June 30, 2010.
- (F)Variable rate security. Interest rate disclosed is that which is in effect at June 30, 2010. Date shown represents the date that the variable rate resets.

Industry classifications are unaudited.

Below, Erik R. Becker, CFA, and Gustaf C. Zinn, CFA, portfolio managers of the Waddell & Reed Advisors Core Investment Fund, discuss positioning, performance and results for the fiscal year ended June 30, 2010. They have each managed the Fund for four years. Both men have 12 years of industry experience.

Erik R. Becker

Gustaf C. Zinn

Fiscal year Performance

For the 12 Months Ended June 30, 2010	
Core Investment Fund (Class A shares at Net Asset Value)	15.04%
Benchmark(s) and/or Lipper Category	
S&P 500 Index (generally reflects the performance of large and medium-size U.S. stocks)	14.43%
Lipper Large-Cap Core Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	12.10%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

A strong market comeback

The stock market has exhibited healthy returns over the previous 12 months as investors have voted that the United States government's many responses to the worst recession in a generation were more right than wrong. The early 2009 moves of the Troubled Asset Relief Program (TARP), Term Asset-Backed Securities Loan Facility (TALF) and buying of mortgages and treasuries, among others, while nontraditional, proved effective at further easing monetary conditions even after the Federal funds rate had been lowered to zero. Consumers, after crawling into a hole for the better part of the past two years became more confident toward the end of 2009 and accelerated purchases on discretionary goods such as autos, appliances, and to a lesser degree, homes. Businesses, flush with cash after having depleted inventories and cutting costs, began to reinvest in capital expenditures and to a lesser extent their work force. As the result of these and other forces, gross domestic product (GDP) has been positive four consecutive quarters.

Today, the market and the economy appear at a crossroads of sorts. A good analogy for where we stand today might be a child learning to ride a bike. At first, mom and dad use training wheels to help a child learn to ride the bike until he or she can ride on their own. But even after the training wheels are removed, the child is susceptible to a rough patch in the road. Eventually, after several falls, the child learns to proficiently ride the bike. As it relates to this economic recovery, the training wheels were the plethora of actions taken by governments globally to stem the decline in economic activity and instill confidence in consumers in businesses. These actions taken to support the financial system include tax credits for housing, the almost \$800 billion stimulus package, the massive fixed-asset

investment stimulus in emerging markets and unemployment insurance, among others. With the help of the training wheels, activity has accelerated, consumers are spending again, businesses are no longer depleting inventory and companies are cautiously hiring.

Rough patches remain

On the other hand, the past three months have served to highlight a number of the potential rough patches in the road or risks to the recovery story. The first major event occurred early in the quarter with a substantial rise in government bond yields in many European nations that had run up large deficits. This focused investor attention on the negative repercussions to growth from fiscal austerity. Second, the Chinese government began efforts to cool that country's growth, sparking fears that a huge source of strength for the global economy could diminish. Third, financial regulation took a populist turn and showed that the regulatory after-effects of the financial crisis would not be pro-growth. Finally, and certainly related to the aforementioned factors above, employment, consumer spending and housing indicators took a step back, suggesting the rate of expansion in the December and March quarters was likely the peak for the time being.

We continue to see a number of positive indicators that suggest to us that we are still on the path of economic recovery, albeit at a slower rate. For one, employment indicators still point to job creation and growth in the hours worked of the labor force here in the U.S. Consumer incomes are moving higher. Inventories and capital spending, two key drivers of the business cycle, are very depressed, substantially helping to reduce the odds of double dip in our view. Third, emerging economies are booming. The growing middle class in areas such as China, India, and Latin America should be a source of growth for large U.S. companies and the economy in general. Finally, November elections are likely to even the balance of power in the House and Senate, likely making regulatory uncertainty less of an issue for the markets and for business of all sizes. Balancing all the positives and negatives, we believe the most likely outcome over the next 12 months is modest economic growth with perhaps greater volatility in financial markets as investors, consumers, business leaders and politicians grapple with the challenges ahead. Using our analogy from above, we're confident that the child will ultimately learn to ride the bike.

Gains across sectors

During the year ended June 30, 2010, all market sectors posted positive returns. Gains were most pronounced among the consumer discretionary, industrial and financial sectors. Absolute performance was driven by holdings in the market-leading financials and consumer discretionary sectors. Performance also was helped by limited exposure to health care and utilities, both of which lagged. The largest material change made to the Fund over the past year was to increase its cyclical exposure, as we gained confidence in the strength of the economic recovery. We have since moved to a more balanced position with a higher level of cash after determining that the rate of the economic recovery had, in our opinion, peaked.

Our strategy continues to focus on companies who have both the opportunity to significantly exceed multi-year earnings forecasts and are in strong competitive positions. The composition of the portfolio has changed to emphasize more stable growth companies and industries as 12-24 month visibility on earnings in many cyclical areas has diminished. At this juncture, we are more apt to invest in a quality food company with great competitive positioning and opportunity to exceed long-term earnings forecasts than we are to invest in a deep cyclical. We still look to identify stocks that appear to be major beneficiaries of multi-year themes that we view as underappreciated, as well as stocks with their own company specific drivers for earnings outperformance. Currently, the most prominent themes include credit loss normalization in the financial sector, mobile computing adoption, energy services, and to a lesser extent, rebounding consumer spending.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Core Investment Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Core Investment Fund (UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	8.42%	9.95%	14.10%	15.48%
5-year period ended 6-30-10	0.54%	0.48%	0.74%	2.05%
10-year period ended 6-30-10	-1.31%	-1.85%	-1.75%	-0.43%

(2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no quarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return ⁽¹⁾				
Class A	\$1,000	\$ 949.50	1.15%	\$ 5.56
Class B	\$1,000	\$ 945.40	2.34%	\$11.28
Class C	\$1,000	\$ 945.90	2.15%	\$10.41
Class Y	\$1,000	\$ 951.50	0.82%	\$ 4.00
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,019.11	1.15%	\$ 5.75
Class B	\$1,000	\$1,013.17	2.34%	\$11.68
Class C	\$1,000	\$1,014.12	2.15%	\$10.78
Class Y	\$1,000	\$1,020.73	0.82%	\$ 4.14

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Below, David P. Ginther, CPA, portfolio manager of the Waddell & Reed Advisors Dividend Opportunities Fund, discusses positioning, performance and results for the fiscal year ended June 30, 2010. He has managed the Fund since its inception and has 15 years of industry experience.

David P. Ginther

Fiscal year Performance

For the 12 Months Ended June 30, 2010	
Dividend Opportunities Fund (Class A shares at net asset value)	5.28%
Benchmark(s) and/or Lipper Category	
Russell 1000 Index (generally reflects the performance of stocks that represent the equity market)	15.24%
Lipper Equity Income Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	14.47%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

A volatile year

The year ended June 30, 2010, proved to be one of dramatic change in the investment markets. When the Fund's fiscal year began, the U.S. economy was in the very early stages of recovery. Beginning in March 2009, shortly before our last report to you, markets around the world began to rally impressively after governments swooped in with stimulus packages to shore up economies and create liquidity. As conditions improved, investors rediscovered their appetite for risk, demonstrating a preference for lower-quality or less financially secure businesses. This drove a low-quality rally that ultimately drove up the prices of those businesses that had declined the most in the credit crisis. By mid-2009, the start of the Fund's fiscal year, news of improving earnings and better consumer sentiment about the global economic outlook bolstered equities. U.S. gross domestic product registered growth in the third quarter for the first time in more than a year, while the final quarter of 2009 saw a broadbased advance, with all sectors recording gains and many economic indicators improving, suggesting that continued recovery may be moving toward sustainability. Also notable during the fourth quarter was the global response to the debt default by Dubai World, a state-owned development company in the United Arab Emirates. This event served as a harsh reminder that while the credit crisis may have faded from the forefront of investors' minds, it clearly was not over. It also reignited concern about the economic challenges facing some of the weakest European countries, particularly Greece, which only intensified later in the period.

The momentum that drove the equity markets higher in the second half of 2009 continued into the first quarter of 2010, albeit at a markedly slower pace. Although many economic

indicators pointed to continued recovery and increasing stability in the U.S. economy, domestic equities spent the bulk of the first quarter searching for direction. This is due in part to events taking place in several emerging markets. China began to tighten credit in an effort to slow down its perhaps too-rapidly-growing economy and stave off inflation. Fallout from that situation combined with escalating concern about economic challenges facing some European countries created volatility. The second quarter of 2010 was volatile for U.S. equities, as a confluence of events weighed on equities. Among the largest factors impacting market performance were intensifying concerns that Europe would lead the world into the second global recession in three years or at least spur a double-dip recession and growing concerns about slowing economic growth in China. The U.S. economy also remains a top concern for investors as recovery slowed perceptibly during the first half of the year and especially in the second quarter. The U.S. unemployment rate currently hovers near 10 percent, and the beleaguered housing sector continues to struggle, particularly so after government stimulus was removed in the second quarter, which additionally restrained performance. Another major event impacting the market was the April 21 oil rig explosion and subsequent massive oil spill in the Gulf of Mexico, which continues to generate ominous headlines on a daily basis. These and other factors collectively have weighed on investor confidence. As one would expect in such an environment, and with little on the horizon generating hope, investors have experienced a crisis in confidence, remaining largely on the sidelines and waiting for direction.

Steadfast approach

Despite the rapidly evolving market that characterized the Fund's fiscal year, we did not stray from our long-held approach to identifying those companies that we feel possess the balance-sheet strength, sustainable business models and earning power and that, in our belief, stand to benefit the most in the early stages of economic recovery. We maintained our focus on dividend growth, rather than high-yielding stocks, and focused on total return. We entered the year defensively positioned, emphasizing stocks that we thought were less sensitive to the recession, but this overly defensive posture ultimately and significantly restrained the Fund's performance relative to its benchmark and peers.

On the plus side, consumer discretionary holdings contributed the most to absolute performance at the sector level. A slight underweight hampered relative performance in this arena, but better stock selection helped mitigate damage. A top name in this arena was Macy's Inc., which has benefited from cost cutting and localization measures and increased effectiveness of its unified national organization. The firm recently reported total sales of \$9.589 billion for the first 22 weeks of 2010; that's up 6.7 percent from total sales for the same period in 2008. Utilities, a very small sector exposure which we ultimately eliminated, were nonetheless a source of strong absolute performance. The Fund benefited from its stake in Dominion Resources, Inc., one of the nation's largest producers and transporters of energy, which has enjoyed rising revenues stemming from warmer weather and rising cooling costs. The Fund's exposure to consumer staples also proved beneficial in absolute terms.

As the year progressed, earnings growth, driven by revenue growth and the ongoing benefits of cost cutting, continued to surprise on the upside. We did make some tactical shifts in an effort to take advantage of this changing environment. One of our larger efforts was to position the Fund a bit more aggressively. Specifically, we increased exposure to the consumer discretionary, industrials and materials sectors and also added selected names in information technology and financials. We eliminated some higher-yielding telecom names - firms that did not appear to us to have upside opportunity - in favor of other holdings that we think are more likely to provide dividend growth and capital appreciation for total return as the economy improves. We have reduced the Fund's overall exposure to energy, but added a few names we think are well positioned to benefit from demand for energy that we believe will likely outstrip supply. We reduced exposure in consumer staples and health care as well.

Cautiously optimistic

The economic outlook continues to improve, although concerns remain about the strength and sustainability of recovery. We fully expect credit to continue to improve throughout 2010, although we think stimulus will begin to slow in the latter half of the year. We are not yet concerned about inflation, despite the enormous liquidity that was injected by the Federal government into the system in an effort to stimulate the economy, because unemployment remains high – a factor that we believe will keep wages from rising too quickly. We are concerned, however, about the effect of increased regulation and taxes, which could restrain economic growth and recovery. In the near term, we remain cautious on consumer spending due to the high unemployment rate, although we believe employment growth will improve in the months ahead. Finally, we believe that dividend-paying stocks should benefit from a continued low-interest-rate environment in which total returns become increasingly important.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Dividend paying investments may not experience the same price appreciation as non-dividend paying investments. These and other risks are more fully described in the Fund's prospectus.

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Lipper Natural Resources Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	9.87 %

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

A volatile year

The year ended June 30, 2010, proved to be one of dramatic change in the investment markets. When the Fund's fiscal year began, the U.S. economy was in the very early stages of recovery. Beginning in March 2009, shortly before our last report to you, markets around the world began to rally impressively after governments swooped in with stimulus packages to shore up economies and create liquidity. As conditions improved, investors rediscovered their appetite for risk, demonstrating a preference for lower-quality or less financially secure businesses. This drove a low-quality rally that ultimately drove up the prices of those businesses that had declined the most in the credit crisis. By mid-2009, the start of the Fund's fiscal year, news of improving earnings and better consumer sentiment about the global economic outlook bolstered equities. U.S. gross domestic product registered growth in the third quarter for the first time in more than a year, while the final quarter of 2009 saw a broadbased advance, with all sectors recording gains and many economic indicators improving, suggesting that continued recovery may be moving toward sustainability. Also notable during the fourth quarter was the global response to the debt default by Dubai World, a state-owned development company in the United Arab Emirates. This event served as a harsh reminder that while the credit crisis may have faded from the forefront of investors' minds, it clearly was not over. It also reignited concern about the economic challenges facing some of the weakest European countries, particularly Greece, which only intensified later in the period.

The momentum that drove the equity markets higher in the second half of 2009 continued into the first quarter of 2010, albeit at a markedly slower pace. Although many economic

indicators pointed to continued recovery and increasing stability in the U.S. economy, domestic equities spent the bulk of the first quarter searching for direction. This is due in part to events taking place in several emerging markets. China began to tighten credit in an effort to slow down its perhaps too-rapidly-growing economy and stave off inflation. Fallout from that situation combined with escalating concern about economic challenges facing some European countries created volatility. The second quarter of 2010 was volatile for U.S. equities, as a confluence of events weighed on equities. Among the largest factors impacting market performance were intensifying concerns that Europe would lead the world into the second global recession in three years or at least spur a double-dip recession and growing concerns about slowing economic growth in China. The U.S. economy also remains a top concern for investors as recovery slowed perceptibly during the first half of the year and especially in the second quarter. The U.S. unemployment rate currently hovers near 10 percent, and the beleaguered housing sector continues to struggle, particularly so after government stimulus was removed in the second quarter, which additionally restrained performance. Another major event impacting the market was the April 21 oil rig explosion and subsequent massive oil spill in the Gulf of Mexico, which continues to generate ominous headlines on a daily basis. These and other factors collectively have weighed on investor confidence. As one would expect in such an environment, and with little on the horizon generating hope, investors have experienced a crisis in confidence, remaining largely on the sidelines and waiting for direction

A steadfast approach

Although the market environment was fluid and rapidly changing throughout the Fund's fiscal year, we remained focused on long-term fundamentals. The Fund's mandate permits it to invest up to 20 percent of assets outside of the energy sector. During the period, the Fund had exposure to the materials and industrials sectors, which contributed significantly to the Fund's outperformance of its benchmark index (before the effect of sales charges). An underweight stake relative to its benchmark in the energy sector also proved beneficial. We maintained our preference for globally diversified oil service and production companies, given our belief that they would be well positioned to gain from increased international exploration and spending and an upturn in the global economy. We also continued to pursue natural gas suppliers as fundamentals deteriorated and

we anticipated the market was nearing a bottom, suggesting production would decrease due to falling rig count and lower prices.

The Fund's top contributor during the year was Continental Resources, Inc., a well managed and fundamentally sound firm, in our view, that is planning to develop the largest new American oilfield in years -- the Bakken Shale, which is a 200,000-squaremile swath of Montana, North Dakota and Canada -- where newer horizontal drilling technology should make this area, previously nearly worthless to drillers, a rich and viable source of oil. Another top contributor was BJ Services Company, a worldwide producer of fracturing services for shale oil and gas operators. The firm was acquired by Baker Hughes Incorporated at an attractive premium for shareholders. Bucyrus International, Inc., a maker of equipment for extracting coal and oil sands that is benefiting from rising global demand also contributed significantly. Bucyrus purchased a division of Terex Corporation, another construction equipment manufacturer, which we feel bodes well for the company's ability to take market share. A new holding acquired during the year was SandRidge Energy, Inc. SandRidge is a high-quality, rapidly growing natural gas and oil company focused primarily on Texas exploration and one that in our view is strategically positioned to prosper in line with continued economic recovery.

Tragedy in the Gulf

Our strategies during the final quarter of the Fund's fiscal year were impacted the most by the oil spill in the Gulf of Mexico. The market reacted almost immediately -- in our view, actually overreacted -- to the explosion. This response was not surprising, especially given the gravity of the headlines, the loss of human life and the black eye the event has given the industry as a whole. It seems pretty clear that BP p.l.c. has primary responsibility, but the whole sector was negatively impacted. The Fund was not exposed to BP, but did hold stock of other firms that were meaningfully involved: Transocean Inc., which owned the rig; Halliburton Company, which provided cementing services, and Cameron International Corporation, which provided subsurface equipment. We sold down the Fund's position in Transocean but rebuilt our position when the stock price fell to what we deemed to be attractive. Halliburton's and Cameron's stock price fell on the news but have subsequently rebounded. Given our confidence in their long-term viability, we took advantage of their price declines to increase the Fund's exposure to both. Going forward, we're taking a wait-and-see approach as this situation continues to evolve, and we're shifting our focus a bit to on-shore natural gas and oil firms.

Cautiously optimistic

The economic outlook continues to improve, although concerns remain. We fully believe credit will continue to improve in 2010, although we think stimulus will begin to slow in the latter half of the year. We believe oil prices will continue to move higher as the world economies continue to recover. Supply and demand remain tight, and we think demand will get even higher, led by

Asia, and mainly China, which now has the largest auto market in the world. Demand in China over the last year was up around a half-million barrels. We also anticipate oil production growth may be limited because capital expenditures for oil fell in 2009. We are hopeful that oil companies will start to spend more in the months ahead, given that the price of oil has moved higher. We're also closely evaluating the sustainability of economic recovery. We don't anticipate interest rates rising at any point soon, but will likely adjust our strategies accordingly if and when that should occur.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in companies involved in one specified sector may be more risky and volatile than an investment with greater diversification. Investing in the energy sector can be riskier than other types of investment activities because of a range of factors, including price fluctuation caused by real and perceived inflationary trends and political developments, and the cost assumed by energy companies in complying with environmental safety regulations. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Energy Fund.

(2)The value of the investment in the Fund is impacted by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽³⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	1.90%	3.03%	7.30%	8.80%
5-year period ended 6-30-10	_	_	_	_
10-year period ended 6-30-10	_	_	_	_
Since inception of Class ⁽⁴⁾ through 6-30-10	-1.39%	-1.51%	-0.77%	0.54%

(3)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

(4)3–1–06 for Class A, Class B, Class C and Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return ⁽¹⁾				
Class A	\$1,000	\$ 876.50	1.68%	\$ 7.88
Class B	\$1,000	\$ 872.30	2.76%	\$12.83
Class C	\$1,000	\$ 872.90	2.48%	\$11.52
Class Y	\$1,000	\$ 879.10	1.11%	\$ 5.17
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,016.44	1.68%	\$ 8.47
Class B	\$1,000	\$1,011.11	2.76%	\$13.78
Class C	\$1,000	\$1,012.51	2.48%	\$12.38
Class Y	\$1,000	\$1,019.28	1.11%	\$ 5.55

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

⁺Includes cash and cash equivalents and other assets and liabilities

Industry and geographical classifications are unaudited.

Below, Chace Brundige, CFA, portfolio manager of the Waddell & Reed Advisors International Growth Fund, discusses positioning, performance and results for the fiscal year ended June 30, 2010. Mr. Brundige has managed the Fund for one year and has 16 years of industry experience.

Chace Brundige

Fiscal year Performance

For the 12 Months Ended June 30, 2010			
International Growth Fund (Class A shares at net asset value)	7.04%		
Benchmark(s) and/or Lipper Category			
MSCI EAFE Growth Index (generally reflects the performance of securities representing international growth securities markets)	8.60%		
Lipper International Large-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	9.45%		

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

A Tale of Two Halves

The year ended June 30, 2010, saw two distinct periods. The first half was a continuation of the massive 2009 rebound as the uptrend continued through the end of the calendar year. January brought renewed fears, largely brought on by the combination of sovereign debt concerns (Greece et al.) and Chinese tightening and volatility returned with a vengeance.

Equity valuation spreads had widened to unprecedented levels in early 2009, at about the time of our last report to you. As the year progressed, value investments began to dramatically outperform their growth counterparts and the dollar continued to weaken against international currencies as investors moved away from safety and increasingly used it as a source of funds. This too began to reverse mid-year as the dollar began to strengthen, driven by fiscal and growth concerns in Europe and a move back to safety.

In November, we saw the first concrete signs of tightening across the globe. In the developed world it was more about removing extraordinary measures that were no longer necessary, while in China the tightening was more traditional, such as increased reserve requirements. Chinese tightening then became more blunt as the government moved to force down property prices, thereby slowing fixed asset investment and impairing an important component of the commodity cycle. Wages began to accelerate as evidenced by well-publicized labor activity. All of this, we believe, leads to a shift in Chinese economic activity from investment to consumption over the coming quarters and years.

Factors impacting performance

Sector returns for the Fund's fiscal year were fairly balanced, with both stable and cyclical sectors among the best performing. The consumer discretionary and financials sectors were the Fund's strongest source of absolute performance. Outstanding stock selection in these arenas more than compensated for the Fund's relative underweight exposure. Materials holdings were also helpful throughout most of the Fund's fiscal year; however, the Fund's significant underweight in this arena largely explains the Fund's relative underperformance. The Fund's exposure to health care stocks helped in absolute terms. The Fund's top individual performers included Tencent Holdings Limited - a Chinese Internet company, no longer held by the Fund and Nestle S.A. - a global packaged foods company. Absolute performance also was lifted by the Fund's exposure to global beer brewers, makers of luxury goods and software providers.

On the down side, performance was restrained by untimely stock selection within the consumer staples and information technology sectors. In particular, investments related to video gaming in China and Japan did not work out as planned. Performance also took a hit from the Fund's mineral and oil services investments, particularly during the latter part of the period, which were negatively impacted by China's economic tightening and the massive oil spill in the Gulf of Mexico.

Positioning for 2010

We made some changes in late 2009 to position the Fund for its second half, which we anticipated would be a very different market. We increased the Fund's exposure to Japan (although our underweight had up to that point proven beneficial) and have focused on export-driven companies that we feel are competitively positioned. While this is a somewhat consensus view, we feel that it is the right one and will continue to shade in that direction. We entered calendar 2010 having hedged our yen exposure and continue that stance, though our currency hedge does not cover our entire Japanese equity position. We also hedged the British pound and euro through part of 2010 but have since removed those positions.

The Fund's cyclical exposure has been focused in information technology and energy companies we purchased on their own merits as opposed to a sector or industry call, but we feel information technology will benefit as companies generally focus capital expenditure budgets on driving efficiencies and cost saving versus increasing production. We believe that our oil services positions could benefit from a global recovery and we prefer that commodity to others based on secular consumer demand in emerging economies as well as a relatively unresponsive global supply. Our concern regarding the materials sector, generally speaking, is that much near-term demand has been generated through stimulative policy decisions in China combined with a focused inventory build ahead of the use of those materials at prices that were considered attractive. Therefore, we feel that the demand outlook, while solid, could be bumpy throughout the rest of 2010. Tightening in the Chinese real estate sector reinforces that view.

Additional changes we made to the Fund were made on a stock-by-stock basis. We have positioned the Fund to potentially benefit from rising wages in China and a move to consumption through direct investments in China and also through the global luxury segment. Luxury is one area where European companies (makers of watches, clothing, handbags or cars) have a distinct edge simply due to the nature of luxury. The goods are expensive and those who can buy them, do, simply to show that they can. We continue to overweight oil services providers, although we have trimmed a few positions and added to and purchased others that appeared to have more upside potential. We increased exposure to auto and truck makers as we anticipate global recovery in those markets. Lastly, we increased the Fund's exposure to India in an attempt to take advantage of rising incomes and infrastructure build out.

A halting recovery, significant headwinds

Our outlook for the months ahead is not entirely optimistic. We believe that western economies are in for tough sledding. Never in post-war history have so many large economies become so levered, compounding it rapidly by spending more than they can collect. The bond markets have essentially called Greece, Portugal and Spain to task. While Europe has seemingly banded together to stave off Greek restructuring (for now) and its cascade of effects, the message is clear - there is too much debt out there. Why not a sovereign debt sell-off in Japan? Why not the United States? When will it become necessary for these countries to become deadly serious about fixing their balance sheets? The answer is unknowable and for that reason calling stock market direction, now and for at least the next few years, is extremely difficult. On the positive side, as we've stated before, companies have generally tolerated the downturn well and their balance sheets and cost structures are in a good position to capture earnings growth should demand materialize. Valuations look attractive to us (in a vacuum) and consensus is at least cautious and perhaps bearish. We will look to buy or add when fear levels are high and sell or trim when overly positive expectations become discounted.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors International Growth Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

International Growth Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	0.89%	1.81%	5.97%	7.49%
5-year period ended 6-30-10	2.49%	2.28%	2.68%	4.14%
10-year period ended 6-30-10	-2.25%	-2.91%	-2.64%	-1.22%

(2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return ⁽¹⁾				
Class A	\$1,000	\$ 892.30	1.51%	\$ 7.10
Class B	\$1,000	\$ 886.50	2.73%	\$ 12.73
Class C	\$1,000	\$ 887.20	2.50%	\$ 11.70
Class Y	\$1,000	\$ 893.50	1.06%	\$ 5.02
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,017.29	1.51%	\$ 7.56
Class B	\$1,000	\$1,011.27	2.73%	\$ 13.58
Class C	\$1,000	\$1,012.42	2.50%	\$ 12.48
Class Y	\$1,000	\$1,019.54	1.06%	\$ 5.35

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

[#]The Fund pays the financing fee multiplied by the notional amount each quarter. On the termination date of the swap contracts, the Fund will pay/receive the return of the underlying security.

Below, Kimberly A. Scott, CFA, portfolio manager of the Waddell & Reed Advisors New Concepts Fund, discusses positioning, performance and results for the fiscal year ended June 30, 2010. She has managed the Fund for nine years and has 23 years of industry experience.

Kimberly A. Scott

Fiscal year Performance

For the 12 Months Ended June 30, 2010	
New Concepts Fund (Class A shares at net asset value)	26.22%
Benchmark(s) and/or Lipper Category	
Russell Mid-Cap Growth Index (reflects the performance of securities that represent the mid-cap sector of the stock market)	21.30%
Lipper Mid-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	20.62%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Strong sectors, strong returns

The 12 months ended June 30, 2010, were volatile but largely positive ones for New Concepts Fund. The mid-cap growth sector had a fairly strong absolute return during the period, although market momentum slowed perceptibly in the final quarter of the Fund's fiscal year. The stocks of medium- and small-size companies that are generally more exposed to economic stresses and credit market concerns rebounded strongly on the promise of improving economic prospects and healing credit markets.

The Fund nicely outperformed its benchmark index and its Lipper peer group (before sales charges) due to the Fund's overweight exposure to the front end of the economy on the conviction that it and the profit cycle was on the cusp of recovery. As such, the Fund has an overweight exposure to the consumer discretionary, energy and financials sectors. The consumer discretionary and financials exposures made the most meaningful contributions to the Fund's relative performance. An underweight in utilities also helped, in both absolute and relative terms. The sector exposures that underperformed the benchmark were in the Fund's health care and energy names. Both groups contributed to absolute performance but detracted in relative terms.

Changes to the Fund's holdings included moving to an overweight position in the industrials sector. We moved out of some positions in the consumer discretionary and information technology sectors as we reached some valuation and price targets given the outsized performance in those groups.

We were encouraged by a number of economic data points, both domestic and international, as we moved into the second quarter. This led us to focus the Fund's investments on the front end of the economy to take advantage of an anticipated turn in economic and market conditions. As such, the Fund had an overweight exposure to the consumer discretionary, information technology and energy sectors early in its fiscal year. We also increased the Fund's exposure to the materials sector to try to take advantage of an improving economy in both the United States and emerging markets. These were very important moves that positively impacted the Fund's return in the second half of 2009, as we were correct in our assessment that the economy and the stock markets were on the cusp of a turn for the better.

Self-sustaining recovery forecasted

We continue to be constructive in our outlook for the domestic and global economies, but recognize that the U.S. stock market has regained considerable ground in the last 12 months, albeit not as dramatically in the final quarter of the Fund's fiscal year, and valuations appear less compelling, though still reasonable, across the market than last spring and early summer. In addition, government policies and the specter of higher taxes and higher interest rates cause concern and command greater attention as the valuation on the equity market increases. Nonetheless, we continue to see areas of investment opportunity in mid-cap equities, particularly those of companies more significantly exposed to the back end of the economy, such as in the industrials, energy and possibly the materials sectors.

We think the market is transitioning from a macroeconomicevent-driven recovery to a sustainable growth focus in which investors will need to identify specific companies that have superior growth and profitability prospects across the economic cycle. We are examining valuation and organic growth opportunities carefully across all sectors as we seek new investments.

We firmly believe that economic health is being restored worldwide, and that economies around the globe stand a very good chance of a successful shift from government stimulus-led recoveries to self-sustaining recoveries. We expect economic growth to be secularly slower in many parts of the world, including the United States, but that growth is likely to be more productive and more profitable than in the recent past.

Looking forward

We see a continued rebound in the global economy based on the ongoing effects of stimulus programs worldwide and an evolution to self-sustaining economic growth. The interest rate environment is still stimulative. However, we believe the course of interest rates and government policy and regulation are two areas to watch as sources of negative pressure on the markets. We also anticipate that the U.S. equity market will transition to a fundamentally focused "stock-picker's" market from the macroeconomic focus of the past two years. Current profitability profiles and demographic trends favor U.S. companies. Finally, we think domestic mid-cap growth companies can be superior investments in this environment, as they tend to be innovative leaders that take share in the broad and diverse U.S. economy, and they usually have significant exposure to vibrant global markets

We will continue to overweight industrials in an attempt to take advantage of any economic recovery that is rolling from the front end of the economy to the back end. We will concentrate less on sector calls and more on stock-specific investments as the market transitions to one that we believe rewards the stocks of companies with sustainable and innovative growth opportunities across the economic cycle.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors New Concepts Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

New Concepts Fund (UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	18.96%	20.88%	25.17%	26.77%
5-year period ended 6-30-10	3.77%	3.71%	4.03%	5.46%
10-year period ended 6-30-10	0.32%	-0.25%	-0.12%	1.38%

(2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return ⁽¹⁾				
Class A	\$1,000	\$ 996.60	1.46%	\$ 7.19
Class B	\$1,000	\$ 990.70	2.55%	\$ 12.54
Class C	\$1,000	\$ 993.50	2.42%	\$11.96
Class Y	\$1,000	\$ 998.90	1.04%	\$ 5.10
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,017.57	1.46%	\$ 7.26
Class B	\$1,000	\$1,012.17	2.55%	\$ 12.68
Class C	\$1,000	\$1,012.78	2.42%	\$ 12.08
Class Y	\$1,000	\$1,019.65	1.04%	\$ 5.15

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Below, Zachary H. Shafran, portfolio manager of the Waddell & Reed Advisors Science and Technology Fund, discusses positioning, performance and results for the fiscal year ended June 30, 2010. He has managed the Fund for nine years and has 22 years of industry experience.

Zachary H. Shafran

Fiscal year Performance

Science and Technology Fund (Class A shares at net asset value)	10.79%
Benchmark(s) and/or Lipper Category	
S&P North American Technology Sector Index (generally reflects the performance of U.S. science and technology stocks)	15.84%
Lipper Science & Technology Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	17.82%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Conservative posture, tech rally slows

Although the Fund produced a very solid return, results trailed those of its benchmark index and peer group. Several factors drove this relative underperformance. The Fund was conservatively positioned throughout much of the year, due to both our investment selections as well as our cash level, which was a little higher than normal at the start of the Fund's fiscal year. We also underestimated the very aggressive response so many companies took in reducing costs and expenses, particularly semiconductor companies. Our bias toward highquality companies also worked against us, as lower-quality securities fueled much of the 2009 rally.

After a very strong run in 2009, the information technology sector lagged the broader market slightly during the first half of 2010; the Fund's underweight position relative to its benchmark index proved advantageous in that environment. Capacity seems tight for many technology products, and concerns about demand persist. This is particularly pronounced in developed economies that continue to struggle, including the United States and Europe. Demand in developing economies, however, remains strong. Our management of the Fund was also impacted by our concern over the effects of the removal of government stimulus as economic recovery continues and softer demand after Chinese New Year. Expectations are that corporate information technology spending will increase, although probably not until the latter half of 2010.

Uncertainty in health care

Due to the broader view that we employ in seeking to identify what we feel are promising investment opportunities, we were affected by several other factors. Until quite late in calendar year 2009, health care stocks underperformed, in some cases guite significantly. This was largely due to concerns about health care reform, which waned as it became increasingly clear that any legislation, were it to be enacted in the near-term, would likely be much less onerous than initially feared. Interestingly, when the much-wrangled legislation was signed into law in March, health care stocks reacted generally positively, which benefited Fund holdings. Some concerns remain regarding the potential for a more difficult and complicated regulatory environment; in our view, the health care reform is more of an expansion of existing law than true reform. Over time, we think the new legislation will help many firms in this space.

As we mentioned earlier, and something we have been focused on for several years, we significantly increased our exposure to biotechnology names. We did so earlier in the year due to a number of clinical developments and increased our exposure yet again later in the year as the market made some previously overvalued stocks outright cheap in our view.

Another notable change to the Fund involved increasing its exposure to alternative energy. Previously we had shied away from the solar space due to concerns about funding and cost competition issues surrounding traditional sources of energy. We began to think those concerns were overdone, and we identified and pursued several attractive opportunities. Solar installs in China and India have started to increase, so we're watching that closely.

It is also worth noting that, with respect to geographical exposure, the Fund is currently more globally diversified than it was last year, as we have expanded our reach into Asia Pacific and South America.

Seeking companies with staying power

Our strategy continues unchanged moving forward. We are adhering to our long-held approach and methodology in seeking to identify what we feel are compelling investment opportunities around the globe that meet our investment criteria. We do this by applying a largely bottom-up, fundamentally driven research process with an overarching top-down perspective. We are looking to sectors that we think will be relatively better prepared to weather a difficult economic environment, and to companies that appear to be more attractively valued and whose businesses we believe are stable and are largely self sufficient when it comes to the need for capital.

As for our global outlook, we remain mostly optimistic, despite some lingering concerns about the financial state of affairs in several pockets of the world. We're also concerned about potential geopolitical disruptions, most specifically the threat of terrorism in whatever form or forms it may materialize. We believe that the tremendous opportunities in science and technology remain as promising as we have seen them in several years, and we look forward to the ongoing innovation and discovery that characterize these two dynamic areas.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in companies involved in one specified sector may be more risky and volatile than an investment with greater diversification. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Science and Technology Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Science and Technology Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	4.42%	5.64%	9.74%	11.19%
5-year period ended 6-30-10	4.17%	4.11%	4.27%	5.76%
10-year period ended 6-30-10	0.86%	0.20%	0.23%	1.83%

(2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return ⁽¹⁾				
Class A	\$1,000	\$ 905.80	1.37%	\$ 6.48
Class B	\$1,000	\$ 901.00	2.50%	\$11.79
Class C	\$1,000	\$ 901.50	2.38%	\$11.22
Class Y	\$1,000	\$ 907.10	1.03%	\$ 4.86
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,017.99	1.37%	\$ 6.86
Class B	\$1,000	\$1,012.40	2.50%	\$12.48
Class C	\$1,000	\$1,012.97	2.38%	\$11.88
Class Y	\$1,000	\$1,019.69	1.03%	\$ 5.15

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Notes to Schedule of Investments

(A)No dividends were paid during the preceding 12 months.

- (B)Deemed to be an affiliate due to the Fund owning at least 5% of the voting securities.
- (C)Listed on an exchange outside the United States.
- (D)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At June 30, 2010, the total value of these securities amounted to \$43,819 or 2.19% of net assets.
- (E)Rate shown is the yield to maturity at June 30, 2010.
- (F)Variable rate security. Interest rate disclosed is that which is in effect at June 30, 2010. Date shown represents the date that the variable rate resets.

The following acronym is used throughout this schedule:

ADR = American Depositary Receipts

Country Diversification

(as a % of net assets)	
United States	77.46%
Brazil	3.64%
South Korea	3.16%
Spain	3.16%
Bermuda	3.14%
Japan	3.10%
Taiwan	2.82%
Canada	1.38%
France	0.83%
India	0.61%
Other+	0.70%

⁺Includes cash and cash equivalents and other assets and liabilities

Industry classifications are unaudited.

Below, Timothy Miller, portfolio manager of the Waddell & Reed Advisors Small Cap Fund, discusses positioning, performance and results for the fiscal year ended June 30, 2010. He assumed portfolio management duties in April 2010, and he has 31 years of industry experience.

Gilbert C. Scott managed the Fund from 2003 through March 31, 2010.

Timothy Miller

Fiscal year Performance

For the 12 Months Ended June 30, 2010				
Small Cap Fund (Class A shares at net asset value)	28.19%			
Benchmark(s) and/or Lipper Category				
Russell 2000 Growth Index (reflects the performance of small company growth stocks)	17.93%			
Lipper Small-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	19.13%			

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Sources of strength

The Fund outperformed its benchmark, the Russell 2000 Growth Index, for the year. The Fund benefited from actively increasing ownership in several companies that fell below \$10 in price during the end of the correction in 2009. These companies performed very well during the beginning stages of the upturn in 2009 and continued to perform through the fiscal year end. Additionally, due to the severity of the market correction, the Fund was able to purchase franchise companies that were previously out of reach to small-cap investors.

The Fund benefited from strong stock selection in the information technology and industrials sectors, in particular Stratasys Inc., ACI Worldwide, Inc., Portfolio Recovery Associates, Inc. and Kansas City Southern. (We subsequently eliminated the Kansas City Southern position.) The energy sector, which experienced negative volatility toward the end of the fiscal year, was nevertheless a positive absolute and relative contributor for the year. Some of the larger gains were harvested in 2010 before the sharp correction that occurred in the fourth quarter triggered by the Gulf of Mexico oil spill. The health care sector significantly underperformed the overall index for the year, and the Fund benefited from its substantial underweight position in health care stocks. The largest absolute sector move for the full year came from consumer sectors although they were also under pressure in the last quarter due to economic concerns and the stubbornly high rate of unemployment. The Fund matched the performance of the consumer discretionary sector for the year, and lagged the smaller consumer staples sector.

Focusing on quality

We increased our stake in the industrial sector on the belief that some companies would deliver outsized earnings performance based on a more fixed-cost model accompanied by revenue increases. We took advantage of the policy uncertainty in health care to initially increase the weighting in securities without overarching reimbursement concerns and attractive valuations. Toward the end of the fiscal year we reversed that weighting as gains were harvested and one of our holdings, Phase Forward Incorporated, was acquired at a nice premium. We lowered the Fund's weighting in the energy sector to reduce the exposure to a cyclical industry that had dramatically outperformed over the past year. And we gradually increased the technology weighting throughout the year reflecting favorable demand characteristics and the strong financial condition of the sector.

Recovery continues, concerns linger

Provided the advance in the markets, we anticipate continued recovery, but the strength and composition of any recovery will be big factors to the market in the upcoming quarters. Thus far, the recovery has been supported by historic fiscal and monetary measures. The pace at which the economy can become self-sustaining and at what level will be important drivers of the market. An increase in bank lending and employment would be signs of a successful transition. Given the high level of leverage in the system and low inflation, we think the growth rate of this recovery may be more muted than historical ones. We believe profits will continue to be strong as cost cutting should be met with higher revenues that yield better margins.

Given the market's dramatic increase from its March 2009 low, a period of consolidation and/or a correction such as recently experienced should not be surprising. The high-quality factor should continue to play out over the balance of this year due to macro and regulatory uncertainties plaguing the markets. The higher quality small caps are the larger companies with strong market positions, debt-free or low-debt balance sheets and high returns on capital. Overall corporate earnings and cash flow should continue to be healthy but the concern over future revenue growth is justifiable. We believe many of our small-capgrowth companies have strong enough product cycles to get through any near-term economic slowdown, and we will continue to favor those stocks and industries.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in small-cap stocks may carry more risk than investing in stocks of larger, more well-established companies. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Small Cap Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Small Cap Fund (UNAUDITED)

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment.

(2)The value of the investment in the Fund is impacted by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽³⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	20.82%	23.02%	27.24%	28.95%
5-year period ended 6-30-10	1.33%	1.41%	1.70%	3.11%
10-year period ended 6-30-10	1.70%	1.29%	1.46%	2.89%

(3)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return ⁽¹⁾				
Class A	\$1,000	\$1,043.10	1.58%	\$ 8.07
Class B	\$1,000	\$1,038.50	2.63%	\$ 13.25
Class C	\$1,000	\$1,039.50	2.41%	\$ 12.14
Class Y	\$1,000	\$1,046.70	1.05%	\$ 5.32
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,016.94	1.58%	\$ 7.97
Class B	\$1,000	\$1,011.75	2.63%	\$ 13.08
Class C	\$1,000	\$1,012.86	2.41%	\$11.98
Class Y	\$1,000	\$1,019.61	1.05%	\$ 5.25

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Below, Sarah C. Ross, CFA, portfolio manager of the Waddell & Reed Advisors Tax-Managed Equity Fund, discusses positioning, performance and results for the fiscal year ended June 30, 2010. Ms. Ross has managed the Fund for 18 months and has 14 years of industry experience.

Fiscal year Performance

For the 12 Months Ended June 30, 2010	
Tax-Managed Equity Fund (Class A shares at net asset value)	5.78%
Benchmark(s) and/or Lipper Category	
Russell 1000 Growth Index (generally reflects the performance of securities that represent the equity market)	13.62%
Lipper Large-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	11.26%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Market recovery dampened by European fears

The 12-month period ended June 30, 2010, started out as a continuation of the market recovery that began in late March of 2009. In the spring of 2009, the market was pricing in investors' worst fears. The housing bubble had burst, leaving millions of homeowners underwater. Consumers and businesses had stopped spending as the global economy appeared on the brink of a potential worldwide recession. Financial institutions were seeing mounting losses and access to capital was dramatically impaired. Aggressive fiscal stimulus helped stabilize the banking system, improve access to capital and shore up consumer and business confidence.

At that time, we felt some of the lowest-quality businesses had the greatest fear priced into their valuations. As sentiment and earnings stabilized throughout 2009 and into 2010, the stock market posted a strong rebound. Low-quality stocks in particular outperformed the rest of the market. Firms with high debt levels, low operating margins and negative free cash flow were in many cases priced to fail and had declined the most during the credit crisis. As the economic backdrop improved, these stocks behaved like coiled springs, posting dramatic rebounds. During the second half of 2009 and through April of 2010 the market continued this upward trajectory as corporate profits continued to improve on aggressive cost cutting.

By the end of April 2010, the Russell 1000 Growth Index had recovered, peak to trough, nearly 80 percent. Investors' fear regarding European sovereign debt and fears of a "double dip" in the global economy pressured stocks in the last few weeks of the fiscal year. High debt levels among many European countries and deteriorating credit quality of governments, such as Greece and Spain, called into question economic recovery. In addition,

U.S. private sector employment recovery throughout 2010 has been slower than expected, putting pressure on growth expectations and equity markets. Despite the recent retrenchment, most sectors within the Russell 1000 Growth Index posted positive returns for the 12 month period.

Drivers of strength and weakness

Although Tax-Managed Equity Fund posted positive absolute returns during the period, the Fund underperformed its benchmark, the Russell 1000 Growth Index. Much of this underperformance can be attributed to the Fund's preference for higher-quality firms during a period in which lower-quality companies staged a great rally for 10 months of the 12-month period. The Fund's overweight exposure to consumer discretionary stocks contributed the most to performance in the period. Top contributors in this arena included Wynn Resorts, Limited, The Home Depot, Inc. and Target Corporation. Consumer staples was also a positive contributor both in terms of stock selection and the decision to underweight the group. The largest detractor was the Fund's bias towards higher quality companies, which had the most negative effect in the second half of 2009.

Moderate growth going forward

We expect the economy to continue its recovery in the second half of 2010, but at a measured pace relative to prior recoveries. The gradual unwinding of monetary and fiscal stimulus, increased regulation and the potential for higher taxes relative to pre-crisis levels will likely be a headwind to economic growth. Despite these headwinds we are not expecting a "double dip" but, rather, believe that gross domestic product may grow 1 to 2 percent. Corporate America has high levels of cash on the balance sheet and has partially deferred capital spending, investment and labor force growth. Unemployment may be slow to recover, but we think high levels of productivity indicate some job creation is likely to occur. We believe structurally advantaged businesses with strong margins, balance sheets and sustainable competitive advantages have emerged from the downturn positioned to take market share. We continue to focus on companies that we believe have a sustainable competitive advantage and that appear to be particularly well positioned to maintain margins and take share in the current environment.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Tax-Managed Equity Fund.

After Taxes on Distributions and Sale of Fund Shares	3.11%	1.27%	-1.34% ⁽²⁾
Russell 1000 Growth Index ⁽³⁾	13.62%	0.38%	-5.14%

⁽¹⁾Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.)

- (2)After-tax returns may be better than before-tax returns due to an assumed tax benefit from losses on a sale of the Fund's shares at the end of the period.
- (3) Reflects no deduction for fees, expenses or taxes.

The table above shows average annual returns on a before-tax and after-tax basis. Returns Before Taxes shows the actual change in the value of the Fund shares over the periods shown, but does not reflect the impact of taxes on Fund distributions or the sale of Fund shares. The two after-tax returns take into account taxes that may be associated with owning Fund shares. Returns After Taxes on Distributions is the Fund's actual performance, adjusted by the effect of taxes on distributions made by the Fund during the period shown. Returns After Taxes on Distributions and Sale of Fund Shares is further adjusted to reflect the tax impact on any change in the value of Fund shares as if they had been sold on the last day of the period.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts, or to shares held by non-taxable entities.

For the Six Months Ended June 30, 2010	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return ⁽¹⁾				
Class A	\$1,000	\$ 902.80	1.16%	\$ 5.52
Class B	\$1,000	\$ 898.30	2.08%	\$ 9.78
Class C	\$1,000	\$ 899.00	2.06%	\$ 9.68
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,019.04	1.16%	\$ 5.86
Class B	\$1,000	\$1,014.48	2.08%	\$10.37
Class C	\$1,000	\$1,014.59	2.06%	\$10.27

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Notes to Schedule of Investments

(A)No dividends were paid during the preceding 12 months.

(B)Rate shown is the yield to maturity at June 30, 2010.

(C)Variable rate security. Interest rate disclosed is that which is in effect at June 30, 2010. Date shown represents the date that the variable rate resets.

The following acronym is used throughout this schedule:

ADR = American Depositary Receipts

Industry classifications are unaudited.

Below, Matthew T. Norris, CFA, portfolio manager of the Waddell & Reed Advisors Value Fund, discusses positioning, performance and results for the fiscal year ended June 30, 2010. He has managed the Fund for seven years and has 19 years of industry experience.

Matthew T Norris

Fiscal year Performance

For the 12 Months Ended June 30, 2010	
Value Fund (Class A shares at net asset value)	19.70%
Benchmark(s) and/or Lipper Category	
Russell 1000 Value Index (generally reflects the performance of value-style stocks)	16.91%
Lipper Large-Cap Value Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	12.92%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

With spring came strength

The market recovered from the lows of spring 2009 thanks, in part, to the impact of various economic stimulus packages. The Russell 1000 Value index, the most directly comparable index for large-cap value investors, enjoyed strong positive performance. Areas of strength included economically sensitive sectors such as retail, consumer products and real estate. Also strong were some financial areas such as banking, which started the calendar year down and experienced a sudden rise throughout the remainder of the year. Lagging areas included more defensive or non-economically sensitive sectors such as utilities and telecommunications. However, in the second quarter of 2010 the market had a retrenchment, as global economic fears took some of the enthusiasm from the market.

Advisors Value Fund's performance was strong due to individual stock selection and a consistent approach to managing portfolio risk. Positive relative performance was driven by large holdings. The Fund also had little exposure to utilities and telecomm, which were weak sectors for the period. Leading individual companies included energy names MarkWest Energy Partners, L.P. and Targa Resources Partners LP, which are involved in natural gas pipelines. Fund returns were negatively impacted by our holding of Nokia Corporation, where we overestimated the challenges facing their introduction of new cellular phones. We have eliminated this holding.

Market recovery contributes to impressive returns

A key strategy of the Fund is to invest in individual equities that we feel are undervalued relative to their prospects, while also attempting to diversify investments in an effort to minimize the impact from macro events. The companies we chose contributed

to absolute return as they rose back towards their true value. Some of the returns were impressive, coming off the lows set in March 2009.

As is consistent with long-term Fund management, we eliminated certain companies from the Fund when they reached a value thought to be reasonable. We added other names when opportunity presented itself. Individual stock selection was the primary contributor to the Fund's strong performance.

A look ahead

The Fund continues to focus on companies with high free-cash flows, thus indicating value. Especially attractive to us were profitable companies with excess cash available, yet limited growing areas to deploy that cash. This situation leads to the use of cash to pay shareholders higher dividends or repurchase their own stock. We believe that investor returns may be coming from actions such as this versus significantly higher earnings or price-to-earnings multiple expansion.

The Fund was overweight in technology and insurance, where the greatest concentration of ideas presented themselves for our investing style. It was underweight in utilities, telecomm and capital equipment, where there was not a large enough discount to our estimate of value to warrant investing.

We believe the Federal Reserve ultimately is going to raise rates as the economy continues to improve, although timing is uncertain. We keep this in mind when assessing the values of firms in which we may invest. Going forward, we do not anticipate meaningful change in our investment process or management philosophy. We continue to search, one company at a time, for names that can offer good value investment opportunities.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Value stocks are stocks of companies that may have experienced adverse business or industry developments; or may be subject to special risks that have caused the stocks to be out of favor and, in the opinion of the Fund's manager, undervalued. The value of a security believed by the Fund's

manager to be undervalued may never reach what the manager believes to be its full value, or such security's value may decrease. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Value Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Value Fund (UNAUDITED)

- (1) The value of the investment in the Fund is impacted by the sales load at the time of the investment.
- (2)The value of the investment in the Fund is impacted by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.
- (3)Because the Fund commenced operations on a date other than at the end of a month, and partial month calculations of the performance of the above indexes (including income) are not available, investment in the indexes was effected as of December 31, 2000.

Average Annual Total Return ⁽⁴⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	12.82%	14.38%	18.55%	20.28%
5-year period ended 6-30-10	-1.77%	-1.73%	-1.51%	-0.16%
10-year period ended 6-30-10	_	_	_	_
Since inception of Class ⁽⁵⁾ through 6-30-10	1.99%	1.62%	1.71%	3.08%

(4)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

(5)12-15-00 for Class A, Class B, Class C and Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return ⁽¹⁾				
Class A	\$1,000	\$ 963.70	1.41%	\$ 6.87
Class B	\$1,000	\$ 957.60	2.48%	\$12.04
Class C	\$1,000	\$ 958.90	2.32%	\$11.26
Class Y	\$1,000	\$ 964.70	0.92%	\$ 4.52
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$1,017.81	1.41%	\$ 7.06
Class B	\$1,000	\$1,012.48	2.48%	\$ 12.38
Class C	\$1,000	\$1,013.28	2.32%	\$11.58
Class Y	\$1,000	\$1,020.22	0.92%	\$ 4.65

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Fiscal year Performance

For the 12 Months Ended June 30, 2010	
Vanguard Fund (Class A shares at net asset value)	8.00%
Benchmark(s) and/or Lipper Category	
Russell 1000 Growth Index (reflects the performance of securities that represent the large-cap growth market)	13.63%
Lipper Large-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	11.26%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

A volatile, but improved market environment

The Fund posted a solid positive return during the fiscal year as the U.S. financial system stabilized and the economy emerged from one of the longest and deepest recessions in recent memory. After a one-year run of nearly uninterrupted gains, U.S. stocks suffered a significant correction in the most recent quarter but still ended up nicely for the year. Despite the Fund's solid absolute return, its performance lagged the benchmark Russell 1000 Growth Index return. The Fund's underperformance was driven by several factors. First, relative performance was hampered by the Fund's ongoing focus on what we believe are high-quality companies with structurally advantaged business models. This strategy served as a headwind throughout much of the past year as the market rally was largely led by lower-quality, higher-beta stocks of companies whose business models were the most distressed and valuations were the most depressed. Once market conditions stabilized and prospects for an economic recovery improved, these low-quality companies experienced a much more dramatic rebound than the dominant market leaders with strong balance sheets that many investors had previously favored. We believe this trend has largely run its course and, more recently, performance across the quality spectrum appears much more balanced. Relative fund performance also was hindered by unfavorable stock selection in the health care and financial sectors, as key holdings including Gilead Sciences Inc., Abbott Laboratories, CME Group Inc. and The Goldman Sachs Group, Inc. lagged the broad market advance. Additional holdings that posted disappointing relative performance included QUALCOMM Incorporated, Weatherford International Ltd., Monsanto Company and McDonald's Corporation. The Goldman Sachs Group, Inc., Weatherford International Ltd. and McDonald's Corporation have been

eliminated from the portfolio. On a positive note, the Fund did benefit from its overweighting in the strongly performing consumer discretionary sector, as well as favorable performance by holdings such as Apple Inc., Wynn Resorts, Limited and Intuitive Surgical, Inc.

An uneven economic recovery

The strong market rebound in the first half of last year clearly provided a favorable backdrop for Fund performance. While the early underpinnings of the rally were rooted in the stabilization of global credit markets and renewed confidence in the U.S. financial system, they were also supported by stronger-thanexpected corporate profits, incrementally better employment strengthening confidence surveys and gradual improvements in the auto and housing markets. This favorable sentiment, however, abruptly changed last quarter with the emergence of the European debt crisis, sparking fears of an economic double dip and the onset of another recession. The flash point was the European banking system, which was negatively impacted as investors called into question the credit quality of various sovereign governments. Without a fully integrated European Union (politically and economically), market concerns centered on the viability of a system that does not appear structurally well prepared to address the current issues. The European crisis, combined with a recent softening in U.S. economic data and worries about China's ability to effectively navigate a soft landing, sparked a significant sell-off given the magnitude of the market's rebound from the lows of March 2009. Throughout all the volatility and uncertainty, our investment strategy has remained consistent and continues to focus on identifying what we feel are dominant companies that can take a durable competitive advantage and sustain high levels of profitability and growth over the long term. While our highquality focus did not particularly benefit the Fund's relative performance over the past year, we remain steadfast in our conviction regarding the merits of our investment philosophy and process.

Strategic reallocations

As the year unfolded, we became less defensive with respect to sector exposure and increasingly sought to position the Fund to benefit from the economic and corporate profit recovery. Areas of emphasis included the technology, consumer discretionary and financial sectors, as these offer the best combination of valuation and earnings growth, in our view. The Fund has a

significant stake in the technology sector, which appears particularly well positioned to benefit from the ongoing global economic rebound. We feel that many of these companies have a strong global presence, possess solid balance sheets, generate strong free cash flow and should benefit from a rebound in corporate spending and continued build out of advanced telecom networks. The Fund reduced its stakes in the consumer staples and health care sectors, given their more defensive growth attributes and lower degree of operating leverage in a recovering economy.

Near-term uncertainty, but long-term opportunity

Performance during the second half of the year was clearly challenging as macro issues dominated the headlines and concerns regarding global GDP growth prospects intensified. International economies have become more correlated over time so recent events certainly have implications for U.S. investors. Waning stimulus spending and growing talk of austerity measures are likely to keep these issues at the forefront of investors' minds. However, even assuming a recession in southern Europe, we do not believe a severe global slowdown resulting in another U.S. recession is at hand. Yet that appears to be what the U.S. bond and equity markets are discounting. During the recent market correction, investors sought relative safety in U.S. government bonds pushing yields near historically low levels. Ultimately, we believe these fears will prove too pessimistic. Corporate America has record high levels of cash on the balance sheet and has deferred capital spending and labor force growth. The current level of economic activity has been so measured that, quite frankly, it is tough to see the imbalances developing that typically cause recessions barring a significant external shock. Furthermore, company fundamentals, liquidity, capital adequacy, monetary policy and the level of understanding of our country's issues are much better understood than in the 2007-08 time period. While the pace of growth will likely be slow and measured, we believe the U.S. economy will still grow at a low single-digit rate which should be supportive of moderate profit growth next year.

In our view, structurally advantaged companies with innovative products and barriers to entry will be able to post solid earnings growth and market share gains even in a slow-growth economy. We believe that in many cases near-term cyclical concerns are getting too much investor focus and favorable secular growth prospects are underappreciated. If one can maintain a longer term perspective and not get caught up in the day-to-day volatility, we believe the current environment is ripe with opportunity for high-quality, large-cap growth investors and one that we expect to benefit from in the future.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Waddell & Reed Advisors Vanguard Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Vanguard Fund (UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class Y
1-year period ended 6-30-10	1.79%	2.69%	6.83%	8.48%
5-year period ended 6-30-10	-0.84%	-0.93%	-0.72%	0.69%
10-year period ended 6-30-10	-3.62%	-4.19%	-4.12%	-2.71%

(2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no quarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.waddell.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class Y shares are not subject to sales charges.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

For the Six Months Ended June 30, 2010	Beginning Account Value 12-31-09	Ending Account Value 6-30-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return ⁽¹⁾				
Class A	\$1,000	\$ 912.80	1.25%	\$ 5.93
Class B	\$1,000	\$ 907.30	2.44%	\$11.54
Class C	\$1,000	\$ 908.10	2.35%	\$11.07
Class Y	\$1,000	\$ 914.20	0.87%	\$ 4.12
Based on 5% Return ⁽²⁾				
Class A	\$1,000	\$ 1,018.60	1.25%	\$ 6.26
Class B	\$1,000	\$ 1,012.69	2.44%	\$12.18
Class C	\$1,000	\$ 1,013.15	2.35%	\$11.68
Class Y	\$1,000	\$ 1,020.48	0.87%	\$ 4.34

^{*}Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 181 days in the six-month period ended June 30, 2010, and divided by 365.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees. See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

⁽¹⁾This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

⁽²⁾This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Waddell & Reed Advisors Funds (amounts in thousands)

JUNE 30, 2010

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Waddell & Reed Advisors Funds, a Delaware statutory trust (the Trust), is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company. Waddell & Reed Advisors Accumulative Fund, Waddell & Reed Advisors Asset Strategy Fund, Waddell & Reed Advisors Continental Income Fund, Waddell & Reed Advisors Core Investment Fund, Waddell & Reed Advisors Dividend Opportunities Fund, Waddell & Reed Advisors Energy Fund, Waddell & Reed Advisors International Growth Fund, Waddell & Reed Advisors New Concepts Fund, Waddell & Reed Advisors Science and Technology Fund, Waddell & Reed Advisors Small Cap Fund, Waddell & Reed Advisors Tax-Managed Equity Fund, Waddell & Reed Advisors Value Fund and Waddell & Reed Advisors Vanguard Fund (each, a Fund) are each a series of the Trust and are the only series of the Trust included in these financial statements. The investment objective(s), policies and risk factors of each Fund are described more fully in that Fund's prospectus and Statement of Additional Information. The investment manager to each Fund is Waddell & Reed Investment Management Company (WRIMCO or the Manager).

Each Fund (except Tax-Managed Equity Fund, which does not offer Class Y) offers Class A, Class B, Class C and Class Y shares. Class A shares are sold at their offering price, which is normally net asset value plus a front-end sales charge. Class B and Class C shares are sold without a front-end sales charge, but may be subject to a contingent deferred sales charge (CDSC). Class Y shares are sold without either a front-end sales charge or a CDSC. All classes of shares have identical rights and voting privileges with respect to the Fund in general and exclusive voting rights on matters that affect that class alone. Net investment income, net assets and net asset value per share may differ due to each class having its own expenses, such as transfer agent and shareholder servicing fees, directly attributable to that class. Class A, Class B and Class C shares have separate distribution and/or service plans. No such plan has been adopted for Class Y shares. Class B shares will automatically convert to Class A shares 96 months after the date of purchase.

The following is a summary of significant accounting policies consistently followed by each Fund.

Securities Valuation. Each Fund calculates the net asset value of its shares as of the close of the New York Stock Exchange (the NYSE), normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading.

Securities traded on U.S. or foreign securities exchanges or included in a national market system are valued at the official closing price at the close of each business day unless otherwise stated below. Over-the-counter securities and listed securities for which no price is readily available are valued at the average of the last bid and asked prices. Security prices are based on quotes that are obtained from an independent pricing service approved by the Board of Trustees.

To determine values of fixed-income securities, the independent pricing service utilizes such factors as current quotations by broker/dealers, coupon, maturity, quality, type of issue, trading characteristics, and other yield and risk factors it deems relevant in determining valuations. Securities which cannot be valued by the independent pricing service are valued using valuations obtained from dealers that make markets in the securities.

Gold bullion is valued at the last traded spot price reported by a pricing service prior to the close of the NYSE.

Options and swaps are valued by the independent pricing service unless the price is unavailable, in which case they are valued at either the mean between the last bid and asked price or using a valuation obtained from a dealer in that security. Futures contracts traded on an exchange are generally valued at the settlement price. Mutual funds, including investment funds, are typically valued at the net asset value reported at the close of each business day.

Forward foreign currency contracts are valued daily based upon the closing prices of the forward currency rates determined at the close of the NYSE as provided by a bank, dealer or independent pricing service.

Senior loans are valued using a composite price from more than one broker or dealer as obtained from an independent pricing service.

Short-term securities with maturities of 60 days or less are valued on the basis of amortized cost (which approximates market value), whereby a portfolio security is valued at its cost initially, and thereafter valued to reflect a constant amortization to maturity of any discount or premium.

Because many foreign markets close before the NYSE, events may occur between the close of the foreign market and the close of the NYSE that could have a material impact on the valuation of foreign securities. The Funds, under the supervision of the Board of Trustees, evaluate the impacts of these events and may adjust the valuation of foreign securities to reflect the fair value as of the close of the NYSE. In addition, all securities for which market values are not readily available or are deemed unreliable are appraised at fair value as determined in good faith under the direction of the Board of Trustees.

Security Transactions and Related Investment Income. Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses are calculated on the identified cost basis. Interest income is recorded on the accrual basis and includes paydown gain (loss) and accretion of discounts and amortization of premiums. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. Upon notification from issuers, some of the distributions received from a real estate investment trust or publicly traded partnership may be redesignated as a reduction of cost of the related investment and/or realized gain.

Securities on a When-Issued or Delayed Delivery Basis. Certain Funds may purchase securities on a "when-issued" basis, and may purchase or sell securities on a "delayed delivery" basis. "When-issued" or "delayed delivery" refers to securities whose terms and indenture are available and for which a market exists, but which are not available for immediate delivery. Delivery and payment for securities that have been purchased by a Fund on a when-issued basis normally take place within six months and possibly as long as two years or more after the trade date. During this period, such securities do not earn interest, are subject to market fluctuation and may increase or decrease in value prior to their delivery. The purchase of securities on a when-issued basis may increase the volatility of a Fund's net asset value to the extent the Fund executes such transactions while remaining substantially fully invested. When a Fund engages in when-issued or delayed delivery transactions, it relies on the buyer or seller, as the case may be, to complete the transaction. Their failure to do so may cause the Fund to lose the opportunity to obtain or dispose of the security at a price and yield it considers advantageous. The Fund maintains internally designated assets with a market value equal to or greater than the amount of its purchase commitments. The Fund may also sell securities that it purchased on a when-issued basis prior to settlement of the original purchase.

Senior Loans. A Fund invests in senior secured corporate loans (senior loans) either as an original lender or as a purchaser of a loan assignment or a participation interest in a loan. Senior loans are generally made to U.S. and foreign borrowers that are corporations, partnerships, or other business entities. Senior loans are generally readily marketable, but some loans may be illiquid or be subject to some restrictions on resale.

Certain senior loans contain provisions that obligate a Fund to fund future commitments at the borrower's discretion. At June 30, 2010, there were no such unfunded commitments.

Interest Only Obligations. These securities entitle the owner to receive only the interest portion from a bond, Treasury note or pool of mortgages. These securities are generally created by a third party separating a bond or pool of mortgages into distinct interest-only and principal-only securities. As the principal (par) amount of a bond or pool of mortgages is paid down, the amount of interest income earned by the owner will decline as well.

Credit Risk. Certain Funds may hold high-yield and/or non-investment-grade bonds, which may be subject to a greater degree of credit risk. Credit risk relates to the ability of the issuer to meet interest or principal payments or both as they become due. The Fund may acquire securities in default, and is not obligated to dispose of securities whose issuers subsequently default.

Foreign Currency Translation. Each Fund's accounting records are maintained in U.S. dollars. All assets and liabilities denominated in foreign currencies are translated into U.S. dollars daily, using foreign exchange rates obtained from an independent pricing service authorized by the Board of Trustees. Purchases and sales of investment securities and accruals of income and expenses are translated at the rate of exchange prevailing on the date of the transaction. For assets and liabilities other than investments in securities, net realized and unrealized gains and losses from foreign currency translation arise from changes in currency exchange rates. Each Fund combines fluctuations from currency exchange rates and fluctuations in market value when computing net realized gain (loss) and net change in unrealized appreciation (depreciation) on investments. Foreign exchange rates are valued as of the close of the NYSE, normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading, primarily using an independent pricing service authorized by the Board of Trustees.

Repurchase Agreements. Each Fund may purchase securities subject to repurchase agreements, which are instruments under which the Fund purchases a security and the seller (normally a commercial bank or broker-dealer) agrees, at the time of purchase, that it will repurchase the security at a specified time and price. Repurchase agreements are collateralized by the value of the resold securities which, during the entire period of the agreement, generally remains at least equal to the value of the agreement, including accrued interest thereon. The collateral for the repurchase agreement is held by a custodian bank.

Investments with Off-Balance Sheet Risk. Certain Funds may enter into financial instrument transactions (such as swaps, futures, options and other derivatives) that may have off-balance sheet market risk. Off-balance sheet market risk exists when the maximum potential loss on a particular financial instrument is greater than the value of such financial instrument, as reflected in the Statement of Assets and Liabilities.

Segregation and Collateralization. In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission (SEC) require that a Fund either delivers collateral or segregates assets in connection with certain investments (e.g., dollar rolls, financial futures contracts, foreign currency exchange contracts, options written, securities with extended settlement periods and swaps), the Fund will segregate collateral or designate on its books and records cash or other liquid securities having a market value at least equal to the amount that is required to be physically segregated for the benefit of the counterparty. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party has requirements to deliver/deposit cash or securities as collateral for certain investments.

Allocation of Income, Expenses, Gains and Losses. Income, expenses (other than those attributable to a specific class), gains and losses are allocated on a daily basis to each class of shares based upon the relative proportion of net assets represented by such class. Operating expenses directly attributable to a specific class are charged against the operations of that class.

Income Taxes. It is the policy of each Fund to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. In addition, each Fund intends to pay distributions as required to avoid imposition of excise tax. Accordingly, no provision has been made for Federal income taxes. Management of the Trust periodically reviews all tax positions to assess that it is more likely than not that the position would be sustained upon examination by the relevant tax authority based on the technical merits of each position. As of and for the fiscal year ended June 30, 2010, management believes that under this standard no liability for unrecognized tax positions is required. The Funds are subject to examination by U.S. federal and state authorities for returns filed for tax years after 2005.

Dividends and Distributions to Shareholders. Dividends and distributions to shareholders are recorded by each Fund on the business day following record date. Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America.

Custodian Fees. "Custodian fees" in the Statement of Operations may include interest expense incurred by a Fund on any cash overdrafts of its custodian account during the period. Such cash overdrafts may result from the effects of failed trades in portfolio securities and from cash outflows resulting from unanticipated shareholder redemption activity. A Fund pays interest to its custodian on such cash overdrafts, to the extent they are not offset by positive cash balances maintained by that Fund, at a rate equal to the custodian's prime rate less 150 basis points. The "Earnings credit" line item, if shown, represents earnings on cash balances maintained by that Fund during the period. Such interest expense and other custodian fees may be paid with these earnings.

Trustees and Chief Compliance Officer Fees. Fees paid to the Trustees can be paid in cash or deferred to a later date, at the election of each Trustee according to the Deferred Fee Agreement entered into between the Trust and the Trustee(s). Each Fund records its portion of the deferred fees as a liability on the Statement of Assets and Liabilities. All fees paid in cash plus any appreciation (depreciation) in the underlying deferred plan are shown on the Statement of Operations. Additionally, fees paid to the office of the Chief Compliance Officer of the Funds are shown on the Statement of Operations.

Indemnifications. The Trust's organizational documents provide current and former Trustees and Officers with a limited indemnification against liabilities arising in connection with the performance of their duties to the Trust. In the normal course of business, the Trust may also enter into contracts that provide general indemnifications. The Trust's maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Trust. The risk of material loss from such claims is considered remote.

Concentration of Risk. Certain Funds may have a concentration of risk which includes, but is not limited to, investing in international securities. International investing involves additional risks including, but not limited to, currency fluctuations, political or economic conditions affecting the foreign country and differences in accounting standards and foreign regulations.

Other. The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. Management has performed a review for subsequent events through the date this report was issued.

2. INVESTMENT MANAGEMENT AND PAYMENTS TO AFFILIATED PERSONS

Management Fees. WRIMCO, a wholly owned subsidiary of Waddell & Reed, Inc. (W&R), serves as each Fund's investment manager. WRIMCO provides investment advice, for which services it is paid a fee. The fee is payable by each Fund at the following annual rates and is accrued daily:

Fund	Net Asset Breakpoints	Annual Rate
Accumulative Fund	Up to \$1 Billion	0.700%
	Over \$1 Billion up to \$2 Billion	0.650%
	Over \$2 Billion up to \$3 Billion	0.600%

	Over \$3 Billion	0.550%

WRIMCO has voluntarily agreed to waive a Fund's management fee on any day that the Fund's net assets are less than \$25 million, subject to WRIMCO's right to change or modify this waiver.

Accounting Services Fees. The Trust has an Accounting Services Agreement with Waddell & Reed Services Company (WRSCO), doing business as WI Services Company (WISC), an affiliate of W&R. Under the agreement, WISC acts as the agent in providing bookkeeping and accounting services and assistance to the Trust, including maintenance of Fund records, pricing of Fund shares and preparation of certain shareholder reports. For these services, each Fund pays WISC a monthly fee of one-twelfth of the annual fee shown in the following table:

Accountin	a Sei	rvices	Fee

Averag	je Net (in mil			Annual Fee Rate for Each Level	
From \$	0	to	\$	10	\$ 0
From \$	10	to	\$	25	\$ 11.5
From \$	25	to	\$	50	\$ 23.1
From \$	50	to	\$	100	\$ 35.5
From \$	100	to	\$	200	\$ 48.4
From \$	200	to	\$	350	\$ 63.2
From \$	350	to	\$	550	\$ 82.5
From \$	550	to	\$	750	\$ 96.3
From \$	750	to	\$1	,000	\$121.6
From \$1	,000	and	Ove	er	\$148.5

In addition, for each class of shares in excess of one, each Fund pays WISC a monthly per-class fee equal to 2.5% of the monthly accounting services base fee.

Administrative Fee. Each Fund also pays WISC a monthly fee at the annual rate of 0.01%, or one basis point, for the first \$1 billion of net assets with no fee charged for net assets in excess of \$1 billion. This fee is voluntarily waived by WISC until a Fund's net assets are at least \$10 million.

Shareholder Servicing. General. Under the Shareholder Servicing Agreement between the Trust and WISC, with respect to Class A, Class B and Class C shares, for each shareholder account that was in existence at any time during the prior month, each Fund pays a monthly fee that ranges from \$1.5042 to \$1.5792. For Class Y shares, each Fund pays a monthly fee equal to one-twelfth of 0.15 of 1% of the average daily net assets of the class for the preceding month. Each Fund also reimburses WISC for certain out-of-pocket costs for all classes.

Networked accounts. For certain networked accounts (that is, those accounts whose Fund shares are purchased through certain financial intermediaries), WISC has agreed to reduce its per account fees charged to the Funds to \$0.50 per month per shareholder account. Additional fees may be paid by the Funds to those intermediaries.

Non-networked accounts. Each Fund pays WISC an annual fee (payable monthly) for each account of the Fund that is non-networked and is as shown above; however, WISC has agreed to reduce that fee if the number of total shareholder accounts within the Complex (Waddell & Reed Advisors Funds, Waddell & Reed InvestEd Portfolios and Ivy Funds) reaches certain levels.

Broker accounts. Certain broker-dealers that maintain shareholder accounts with each Fund through an omnibus account provide transfer agent and other shareholder-related services that would otherwise be provided by WISC if the individual accounts that comprise the omnibus account were opened by their beneficial owners directly. Each Fund may pay such broker-dealers a per account fee for each open account within the omnibus account, or a fixed rate fee, based on the average daily net asset value of the omnibus account (or a combination thereof).

Distribution and Service Plan for Class A Shares. Under a Distribution and Service Plan for Class A shares adopted by the Trust pursuant to Rule 12b–1 under the Investment Company Act of 1940, each Fund may pay a distribution and/or service fee to W&R in an amount not to exceed 0.25% of the Fund's average annual net assets. The fee is paid daily to compensate W&R for amounts it expends in connection with the distribution of the Class A shares and/or provision of personal services to Fund shareholders and/or maintenance of shareholder accounts of that class either directly or by third parties. For each of Accumulative Fund, Core Investment Fund and Tax-Managed Equity Fund, the Board of Trustees has limited payments to 0.234%, 0.249% and 0.236%, respectively, of the Fund's average Class A net assets on an annual basis. The Board may in the future, without shareholder approval, authorize payments up to a maximum of 0.25% of the Fund's average Class A net assets on an annual basis, if it determines to do so.

Distribution and Service Plan for Class B and Class C Shares. Under the Distribution and Service Plan adopted by the Trust for Class B and Class C shares, respectively, each Fund may pay W&R a service fee not to exceed 0.25% and a distribution fee not to exceed 0.75% of the Fund's average annual net assets attributable to that class to compensate W&R for its services in connection with the distribution of shares of that class and/or provision of personal services to Class B or Class C shareholders and/or maintenance of shareholder accounts of that class.

Sales Charges. As principal underwriter for the Trust's shares, W&R receives sales commissions (which are not an expense of the Trust) for sales of Class A shares. A contingent deferred sales charge (CDSC) may be assessed against a shareholder's redemption amount of Class B, Class C or certain Class A shares and is paid to W&R. During the fiscal year ended June 30, 2010, W&R received the following amounts in sales commissions and CDSC:

	Gross Sales		CDSC	
	Commissions	Class A	Class B	Class C
Accumulative Fund	\$ 760	\$ —*	\$ 15	\$ —*
Asset Strategy Fund	8,365	9	72	17
Continental Income Fund	539	_*	4	*
Core Investment Fund	2,180	*	19	1
Dividend Opportunities Fund	910	1	12	1
Energy Fund	534	_*	6	*
International Growth Fund	363	_	3	*
New Concepts Fund	1,373	_	12	1
Science and Technology Fund	2,451	*	23	2
Small Cap Fund	856	_	12	1
Tax-Managed Equity Fund	210	1	1	1
Value Fund	441	*	7	*
Vanguard Fund	894	_	10	*
*Not shown due to rounding.				

With respect to Class A, Class B and Class C shares, W&R pays sales commissions and all expenses in connection with the sale of the Trust's shares, except for registration fees and related expenses. During the fiscal year ended June 30, 2010, the following amounts were paid by W&R:

Accumulative Fund	\$ 462
Asset Strategy Fund	5,143
Continental Income Fund	328
Core Investment Fund	1,280
Dividend Opportunities Fund	578
Energy Fund	336
International Growth Fund	211
New Concepts Fund	836
Science and Technology Fund	1,461
Small Cap Fund	528
Tax-Managed Equity Fund	141
Value Fund	277
Vanguard Fund	534

Waivers of Expenses. During the fiscal year ended June 30, 2010, the following amounts were waived as a result of the reduced management fees related to the settlement agreement:

Accumulative Fund	\$ 431
Asset Strategy Fund	100
Continental Income Fund	122
Core Investment Fund	600
International Growth Fund	165
New Concepts Fund	198
Science and Technology Fund	200
Small Cap Fund	139
Value Fund	37
Vanguard Fund	300

For each of Accumulative Fund, Core Investment Fund and Tax-Managed Equity Fund, the Board of Trustees has limited Rule 12b–1 payments to 0.234%, 0.249% and 0.236%, respectively, of the Fund's average Class A net assets on an annual basis. During the fiscal year ended June 30, 2010, the following amounts represent the difference between 0.25% and the reduced Rule 12b–1 fees:

Accumulative Fund	\$ 205
Core Investment Fund	25
Tax-Managed Equity Fund	19

3. INVESTMENT VALUATIONS

Fair value is defined as the price that each Fund would receive upon selling an asset or would pay upon satisfying a liability in an orderly transaction between market participants at the measurement date. Accounting standards establish a framework for measuring fair value and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own

assumptions about the factors that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. An individual investment's fair value measurement is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 – unadjusted quoted prices in active markets for identical securities

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments)

The following tables summarize the valuation of each Fund's investments by the above fair value hierarchy levels as of June 30, 2010:

Fund	Level 1	Level 2	Level 3

Transfers from Level 2 to Level 3 occurred generally due to the lack of observable market data due to decreased market activity or information for these securities. Transfers from Level 3 to Level 2 occurred generally due to the increased availability of observable market data due to increased market activity or information. As shown above, transfers in and out of Level 3 represent the value at the later of the beginning of the fiscal period or the purchase date of the security.

Net realized gain (loss) and net unrealized appreciation (depreciation), shown on the reconciliation of Level 3 investments if applicable, are included on the Statement of Operations in net realized gain (loss) on investments in unaffiliated securities and in net change in unrealized appreciation (depreciation) on investments in unaffiliated securities, respectively. Additionally, the net change in unrealized appreciation for all Level 3 investments still held as of June 30, 2010, if applicable, is included on the Statement of Operations in net change in unrealized appreciation (depreciation) on investments in unaffiliated securities.

As shown above, the Funds may own different types of assets that are classified as Level 2 or Level 3. Assets classified as Level 2 can have a variety of observable inputs, including, but not limited to, benchmark yields, reported trades, broker quotes, benchmark securities, and bid/offer quotations. These observable inputs are collected and utilized, primarily by an independent pricing service, in different evaluated pricing approaches depending upon the specific asset to determine a value.

Securities' values included in the reconciliations above have been primarily determined through the use of a single quote (or multiple quotes) from dealer(s) in the securities using proprietary valuation models. These quotes involve significant unobservable inputs, and thus the related securities are classified as Level 3 investments.

4. INVESTMENT SECURITIES TRANSACTIONS

For the fiscal year ended June 30, 2010, the cost of purchases and the proceeds from maturities and sales of investment securities, other than U.S. Government and short-term securities, were as follows:

	Purchases	Sales
Accumulative Fund	\$ 618,109	\$ 748,710
Asset Strategy Fund	2,816,006	2,774,323
Continental Income Fund	389,784	413,605
Core Investment Fund	2,551,178	2,895,545
Dividend Opportunities Fund	327,465	293,550
Energy Fund	48,771	48,103
International Growth Fund	458,821	494,837
New Concepts Fund	576,296	577,231
Science and Technology Fund	1,075,600	958,041
Small Cap Fund	428,852	379,103
Tax-Managed Equity Fund	65,920	42,751
Value Fund	230,729	206,302
Vanguard Fund	792,668	873,261

Purchases of and proceeds from maturities and sales of U.S. Government securities were as follows:

	Purchases	Sales
Asset Strategy Fund	\$ —	\$ 2,309
Continental Income Fund	5,032	26,503

5. FEDERAL INCOME TAX MATTERS

For Federal income tax purposes, cost of investments owned at June 30, 2010 and the related unrealized appreciation (depreciation) were as follows:

Fund	Cost of investments	Gross appreciation	Gross depreciation	Net unrealized appreciation (depreciation)
Accumulative Fund	\$1,059,857	\$ 117,909	\$ 119,497	\$ (1,588)
Asset Strategy Fund	2,629,921	448,020	106,724	341,296
Continental Income Fund	528,513	61,210	18,526	42,684
Core Investment Fund	2,327,935	224,965	127,309	97,656
Dividend Opportunities Fund	572,063	53,117	37,890	15,227
Energy Fund	194,836	23,969	29,568	(5,599)
International Growth Fund	480,089	44,374	42,853	1,521
New Concepts Fund	907,406	223,959	50,803	173,156
Science and Technology Fund	1,985,247	261,874	247,636	14,238
Small Cap Fund	644,166	141,733	45,174	96,559
Tax-Managed Equity Fund	124,556	19,369	4,552	14,817
Value Fund	361,393	40,526	28,702	11,824
Vanguard Fund	955,538	150,948	29,620	121,328

For Federal income tax purposes, the Funds' distributed and undistributed earnings and profit for the fiscal year ended June 30, 2010 and the related net capital losses and post-October activity were as follows:

	Accumulative Fund	Asset Strategy Fund	Continental Income Fund	Core Investment Fund	Dividend Opportunities Fund	Energy Fund	International Growth Fund
Net ordinary income	\$4,464	\$30,125	\$ 7,388	\$4,589	\$6,444	\$ —	\$3,315
Distributed ordinary income	5,519	10,853	6,502	7,794	6,030	_	6,226
Undistributed ordinary income	1,854	29,782	886	_	1,218	_	3,127
Realized long term capital gains	_	_	29,168	_	_	_	_
Distributed long term capital gains	_	_	_	_	_	_	
Undistributed long term capital gains	_	_	29,168	_	_	_	
Tax return of capital	_	_	_	1,315	_	_	_
Post-October losses deferred	_	4,133	_	_	3,222	6,599	678
	New Concepts Fund	Science and Technology Fund	y Small Cap Fund	Tax- Managed Equity Fund	Value Fund	Vanguard Fund	
Net ordinary income	\$ 12,683	\$ —	\$ —	\$44	\$ 714	\$ 809	_
Distributed ordinary income	_	_	_	44	2,491	3,310	
Undistributed ordinary income	12,683	_	_	_	_	_	
Realized long term capital gains	4,300	56,819	_	_	_	_	
Distributed long term capital gains	_	9,698	_			_	
Undistributed long term capital gains	4,300	47,122	_	_	_	_	
Tax return of capital	_	_	_	70	317	1,055	
Post-October losses deferred	_	199	_	_	2.528	_	

Internal Revenue Code regulations permit each Fund to defer into its next fiscal year net capital losses or net long-term capital losses and currency losses incurred between each November 1 and the end of its fiscal year (post-October losses). Distributions shown above may be reported differently to individual shareholders.

Capital loss carryovers are available to offset future realized capital gain net income incurred in the eight taxable years succeeding the loss year for Federal income tax purposes. The following table shows the totals by year in which the capital loss carryovers will expire if not utilized.

	Accumulative Fund	Asset Strategy Fund	Continental Income Fund	Core Investment Fund	Dividend Opportunities Fund	Energy Fund	International Growth Fund
June 30, 2011	\$104,385	\$ —	\$ —	\$ —	\$ —	\$ —	\$ 83,095

June 30, 2012	_	78	_	_
June 30, 2017	57,592	909	31,640	68,091
June 30, 2018	15,433	10,285	13,592	63,840
Total carryover	\$ 73,025	\$ 17,616	\$45,232	\$131,931

Retirement Shares was merged into Continental Income Fund as of June 29, 2009 (see Note 12). At the time of the merger, Retirement Shares had capital loss carryovers available to offset future gains of Continental Income Fund. These carryovers are limited to \$10,702 for each period ending from June 30, 2011 through 2016 plus any unused limitations from prior years.

Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America. These differences are due to differing treatments for items such as deferral of wash sales and post-October losses, foreign currency transactions, net operating losses and expiring capital loss carryovers.

At June 30, 2010, the following reclassifications were made: Accumulative Fund reclassified permanent differences relating to differing treatments of expiring capital loss carryovers; Asset Strategy Fund reclassified permanent differences relating to differing treatments of PFIC transactions, foreign currency gains and losses and currency option income; Continental Income Fund reclassified permanent differences relating to differing treatments of partnership distributions and mortgage-backed security paydowns; Core Investment Fund reclassified permanent differences relating to differing treatments of partnership distributions; Energy Fund reclassified permanent differences relating to differing treatments of partnership distributions; International Growth Fund reclassified permanent differences relating to differing treatments of settlement payments received; New Concepts Fund reclassified permanent differences relating to differing treatments of net operating losses and partnership distributions; Science and Technology Fund reclassified permanent differences relating to differing treatments of net operating losses and partnership distributions; Tax-Managed Equity Fund reclassified permanent differences relating to differing treatments of return of capital; Value Fund reclassified permanent differences relating to differing treatments of return of capital; Value Fund reclassified permanent differences relating to differing treatments of return of capital; value Fund reclassified permanent differences relating to differing treatments of return of capital; and Vanguard Fund reclassified permanent differences relating to differing treatments of return of capital.

6. MULTICLASS OPERATIONS

The Trust has authorized an unlimited number of no par value shares of beneficial interest of each class. Transactions in shares of beneficial interest were as follows:

7. DERIVATIVE INSTRUMENTS

Forward Foreign Currency Contracts. Each Fund may enter into forward foreign currency contracts (forward contracts) for the purchase or sale of a foreign currency at a negotiated rate at a future date. Forward contracts are reported on a schedule following the Schedule of Investments. Forward contracts will be valued daily based upon the closing prices of the forward currency rates determined at the close of the NYSE as provided by a bank, dealer or independent pricing service. The resulting unrealized appreciation and depreciation is reported in the Statement of Assets and Liabilities as a receivable or payable and in the Statement of Operations within the change in unrealized appreciation (depreciation). At contract close, the difference between the original cost of the contract and the value at the close date is recorded as a realized gain (loss) in the Statement of Operations.

Risks to a Fund include both market and credit risk. Market risk is the risk that the value of the forward contract will depreciate due to unfavorable changes in the exchange rates. Credit risk arises from the possibility that the counterparty will default. If the counterparty defaults, a Fund's maximum loss will consist of the net amount of contractual payments that the Fund has not yet received.

Futures Contracts. Each Fund may engage in buying and selling futures contracts. Upon entering into a futures contract, the Fund is required to deposit, in a segregated account, an amount equal to a varying specified percentage of the contract amount. This amount is known as the initial margin. Subsequent payments (variation margins) are made or received by the Fund each day, dependent on the daily fluctuations in the value of the underlying debt security or index.

Futures contracts are reported on a schedule following the Schedule of Investments. Securities held in collateralized accounts to cover initial margin requirements on open futures contracts are identified in the Schedule of Investments. Cash held by the broker to cover initial margin requirements on open futures contracts and the receivable and/or payable for the daily mark to market for the variation margin are noted in the Statement of Assets and Liabilities. The net change in unrealized appreciation (depreciation) is reported in the Statement of Operations. Realized gains (losses) are reported in the Statement of Operations at the closing or expiration of futures contracts.

Risks of entering into futures contracts include the possibility of loss of securities or cash held as collateral, that there may be an illiquid market where the Fund is unable to close the contract or enter into an offsetting position and, if used for hedging purposes, the risk that the price of the contract will correlate imperfectly with the prices of the Fund's securities.

Swap Agreements. Each Fund may invest in swap agreements.

Credit default swaps involve the exchange of a fixed rate premium for protection against the loss in value of an underlying security in the event of a defined credit event, such as payment default or bankruptcy. Under a credit default swap one party acts as a guarantor by receiving the fixed periodic payment in exchange for the commitment to purchase the underlying security at par if the defined credit event occurs. A Fund may enter into credit default swaps in which either it or its counterparty act as the guarantor.

Total return swaps involve a commitment to pay periodic interest payments in exchange for a market-linked return based on a security or a basket of securities representing a variety of securities or a particular index. To the extent the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty.

Variance swaps involve a contract in which two parties agree to exchange cash flows based on the measured variance of a specified underlying security or index during a certain time period. On the trade date, the two parties agree on the strike price of the contract (the reference level against which cash flows are exchanged), as well as the number of units in the transaction and the length of the contract. Like an option contract, the value of a variance swap is influenced by both realized and implied volatility, as well as the passage of time. A Fund may enter into variance swaps to manage volatility risk.

The creditworthiness of firms with which a Fund enters into a swap agreement is monitored by WRIMCO. If a firm's creditworthiness declines, the value of the agreement would likely decline, potentially resulting in losses. If a default occurs by the counterparty to such a transaction, the Fund will have contractual remedies pursuant to the agreement related to the transaction.

Option Contracts. Options purchased by a Fund are accounted for in the same manner as marketable portfolio securities. The cost of portfolio securities acquired through the exercise of call options is increased by the premium paid to purchase the call. The proceeds from securities sold through the exercise of put options are decreased by the premium paid to purchase the put.

When a Fund writes (sells) an option, an amount equal to the premium received by the Fund is recorded as a liability. The amount of the liability is subsequently adjusted to reflect the current market value of the option written. The current market value of an option is the last sales price on the principal exchange on which the option is traded or, in the absence of transactions, the mean between the bid and asked prices or at a value supplied by a broker-dealer. When an option expires on its stipulated expiration date or a Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the call option was sold) and the liability related to such option is extinguished. When a call option is

exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether a Fund has realized a gain or loss. For each Fund, when a written put is exercised, the cost basis of the securities purchased by a Fund is reduced by the amount of the premium received.

Investments in options, whether purchased or written, involve certain risks. Writing put options and purchasing call options may increase a Fund's exposure to the underlying security (or basket of securities). With written options, there may be times when a Fund will be required to purchase or sell securities to meet its obligation under the option contract where the required action is not beneficial to the Fund, due to unfavorable movement of the market price of the underlying security (or basket of securities). Additionally, to the extent a Fund enters into over-the-counter (OTC) option transactions with counterparties, the Fund will be exposed to the risk that counterparties to these OTC transactions will be unable to meet their obligations under the terms of the transaction.

Collateral. The Fund may mitigate counterparty risk through credit support annexes (CSA) included with an International Swaps and Derivatives Association, Inc. (ISDA) Master Agreement which is the standard contract governing most derivative transactions between the Fund and each of its counterparties. The CSA allows the Fund to offset with its counterparty certain derivative financial instruments' payables and/or receivables with collateral, which is generally held by the Fund's custodian. The amount of collateral moved to/from applicable counterparties is based upon minimum transfer amounts specified in the CSA. To the extent amounts due to the Fund from its counterparties are not fully collateralized contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance. See Note 1 "Segregation and Collateralization" for additional information with respect to collateral practices.

Objectives and Strategies

Accumulative Fund. The Fund's objective in using derivatives during the period was to enhance the performance of the Fund by adding premium income from written options. To achieve this objective, the Fund had written primarily deep out of the money calls and puts on individual domestic equity securities.

There were no open derivative instruments as of June 30, 2010.

The effect of derivative instruments on the Statement of Operations for the fiscal year ended June 30, 2010:

Type of Risk Exposure	Location of Gain (Loss) on Derivatives Recognized in the Statement of Operations	Realized Gain (Loss) on Derivatives Recognized in the Statement of Operations	Appreciation (Depreciation) on Derivatives Recognized in the Statement of Operations
Equity	Net realized gain (loss) on investments in unaffiliated securities and written options/ Net change in unrealized appreciation (depreciation) on written options	\$2,237	\$(240)

During the fiscal year ended June 30, 2010, the Fund's average number of written option contracts outstanding was 5.

Asset Strategy Fund. The Fund's objectives in using derivatives during the period included hedging market risk on equity securities, increasing exposure to various equity markets, managing exposure to various foreign currencies, managing exposure to precious metals, and hedging certain event risks on positions held by the Fund. To achieve the objective of hedging market risk and increasing exposure to equity markets, the Fund utilized futures and option contracts, both short and long, on foreign and domestic equity indices. To manage foreign currency exposure, the Fund utilized forward contracts and option contracts to either increase or decrease exposure to a given currency. To manage exposure to precious metals, the Fund utilized gold futures contracts. To manage event risks, the Fund utilized short futures on foreign and domestic equity indices and option contracts, both written and purchased, on individual equity securities owned by the Fund.

Fair values of derivative instruments as of June 30, 2010:

	Asset Derivatives		Liability Derivatives		
Type of Risk Exposure	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location		Fair 'alue
Equity	Unrealized appreciation on futures contracts*	\$54,332	N/A	\$	0
Foreign currency	Unrealized appreciation on forward foreign currency contracts and investments in unaffiliated securities at market value**	9,636	Unrealized depreciation on forward foreign currency contracts and written options at market value		,242
Commodities	N/A	0	N/A		0
Total		\$63,968		\$8	,242

^{*}The fair value presented includes cumulative gain (loss) on open futures contracts; however, the value reflected in the accompanying Statement of Assets and Liabilities is only the unsettled variation margin receivable (payable) as of June 30, 2010.

^{**}Purchased options are reported as investments in unaffiliated securities and are reflected in the accompanying Schedule of Investments.

The effect of derivative instruments on the Statement of Operations for the fiscal year ended June 30, 2010:

Type of Risk Exposure	Location of Gain (Loss) on Derivatives Recognized in the Statement of Operations	Realized Gain (Loss) on Derivatives Recognized in the Statement of Operations	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in the Statement of Operations
Equity	Net realized gain (loss) on investments in unaffiliated securities and written options and futures contracts/Net change in unrealized appreciation (depreciation) on investments in unaffiliated securities and futures contracts	\$(268,235)	\$ 101,143

Commodities	and forward foreign currency contracts Net realized gain (loss) on futures contracts/ Net change in unrealized appreciation	13,467	(2,135)
	(depreciation) on futures contracts	460	(111)
Total		\$(254,308)	<u>\$ 98,897</u>

During the fiscal year ended June 30, 2010, the Fund's average principal amount outstanding for forward contracts and market value outstanding for futures contracts were as follows: short forward contracts – \$580,749, long forward contracts – \$583,279, short futures contracts – \$462,821, long futures contracts – \$44,494. Additionally, the Fund's average number of purchased option contracts and written option contracts outstanding was 16 and 4, respectively.

International Growth Fund. The Fund's objective in using derivatives during the period was to manage the exposure to various foreign currencies and gain exposure to certain individual securities that are not available for direct purchase. To manage foreign currency exposure, the Fund utilized forward contracts to either increase or decrease exposure to a given currency. To gain exposure to certain individual securities, the Fund utilized total return swaps.

Fair values of derivative instruments as of June 30, 2010:

	Asset Derivatives		Liability Derivatives		
Type of Risk Exposure	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value	
Equity	N/A	\$ 0	Unrealized depreciation on swap agreements	\$ 857

The effect of derivative instruments on the Statement of Operations for the fiscal year ended June 30, 2010:

Type of Risk Exposure	Location of Gain (Loss) on Derivatives Recognized in the Statement of Operations	Realized Gain (Loss) on Derivatives Recognized in the Statement of Operations		Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in the Statement of Operations	
Equity	Net change in unrealized appreciation (depreciation) on swap agreements	\$	0	\$	(857)
Foreign currency	Net realized gain (loss) on forward foreign currency contracts/Net change in unrealized appreciation (depreciation) on forward foreign currency contracts		7,490		1,032
Total	iomaia ioroigii camone, comiacio	\$	7,490	\$	175

During the fiscal year ended June 30, 2010, the Fund's average principal amount outstanding for short forward contracts and long forward contracts was \$71,840 and \$68,831, respectively. Additionally, the Fund's average notional amount outstanding for total return swaps was \$1,900.

New Concepts Fund. The Fund's objectives to using derivatives during the period was to both gain exposure to certain sectors and to hedge certain event risks on positions held by the Fund. To achieve these objectives, the Fund utilized options, both written and purchased, on either an index or on individual or baskets of equity securities.

There were no open derivative instruments as of June 30, 2010.

The effect of derivative instruments on the Statement of Operations for the fiscal year ended June 30, 2010:

Type of Risk Exposure	Location of Gain (Loss) on Derivatives Recognized in the Statement of Operations	Realized Gain (Loss) on Derivatives Recognized in the Statement of Operations	Appreciation (Depreciation) on Derivatives Recognized in the Statement of Operations
Equity	Net realized gain (loss) on investments in unaffiliated securities and written options/ Net change in unrealized appreciation (depreciation) on investments in unaffiliated securities and written options	\$990	\$557

During the fiscal year ended June 30, 2010, the Fund's average number of purchased option contracts and written option contracts outstanding was 4 and 5, respectively.

Science and Technology Fund. The Fund's objective in using derivatives during the period was to hedge market risk on securities in its portfolio. To achieve this objective, the Fund utilized options, both written and purchased, on individual equity securities owned by the Fund.

There were no open derivative instruments as of June 30, 2010.

The effect of derivative instruments on the Statement of Operations for the fiscal year ended June 30, 2010:

Type of Risk Exposure	Location of Gain (Loss) on Derivatives Recognized in the Statement of Operations	Realized Gain (Loss) on Derivatives Recognized in the Statement of Operations	Appreciation (Depreciation) on Derivatives Recognized in the Statement of Operations
Equity	Net realized gain (loss) on investments in unaffiliated securities and written options	\$9,081	\$0

During the fiscal year ended June 30, 2010, the Fund's average number of purchased option contracts and written option contracts outstanding was 90 and 211, respectively.

Value Fund. The Fund's objective in using derivatives during the period has been to generate additional income from written option premiums; and secondarily to gain exposure to or facilitate trading in certain securities. To achieve these objectives, the Fund utilized options, both written and purchased, on individual equity securities.

Fair values of derivative instruments as of June 30, 2010:

	Asset Derivatives		Liability Derivatives	
Type of Risk Exposure	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
Equity	Investments in unaffiliated securities at market value**	\$196	Written options at market value	\$773
	at market value	\$190	market value	

^{**}Purchased options are reported as investments in unaffiliated securities and are reflected in the accompanying Schedule of Investments

The effect of derivative instruments on the Statement of Operations for the fiscal year ended June 30, 2010:

9. COMMITMENTS

In connection with Asset Strategy Fund's investment in Vietnam Azalea Fund Limited (VAF), the Fund is contractually committed to provide additional capital of up to \$3,732 if and when VAF requests such contributions or draw downs. The total commitment is limited to \$11,000. At June 30, 2010, Asset Strategy Fund had made a total contribution of \$7,268. No public market currently exists for the shares of VAF nor are the shares listed on any securities exchange. VAF intends to become listed within one year after the final commitment has been drawn down. VAF's investment strategy is to make minority investments in future blue-chip Vietnamese companies that are already listed or intend to be listed in the next 24 months.

(2)Company was no longer an affiliate at June 30, 2010.

11. IN-KIND REDEMPTIONS

A Fund may, under certain circumstances, redeem portfolio securities rather than cash for a redemption of Fund shares (in-kind redemption). The Fund recognizes a gain or loss on in-kind redemptions to the extent that the value of the redeemed securities differs on the date of the redemption from the cost of those securities. Gains and losses realized from in-kind redemptions are not recognized for tax purposes but rather are reclassified from accumulated undistributed net realized loss to paid-in capital. During the fiscal year ended June 30, 2009, Accumulative Fund realized \$3,920 of net capital losses resulting from in-kind redemptions of \$21,670. During the fiscal year ended June 30, 2009, Tax-Managed Equity Fund realized \$3 of net capital gains resulting from in-kind redemptions of \$178.

12. ACQUISITION OF RETIREMENT SHARES BY CONTINENTAL INCOME FUND

On June 29, 2009, Continental Income Fund acquired all the net assets of Retirement Shares pursuant to a plan of reorganization approved by the Board of Trustees on February 4, 2009. The acquisition was accomplished by a tax-free exchange of 35,282 shares of Continental Income Fund (valued at \$232,156) for the 42,551 shares of Retirement Shares outstanding on June 29, 2009. Retirement Shares had net assets of \$232,156, including \$6,922 of net unrealized appreciation in value of investments and \$318,585 of accumulated net realized losses on investments, which were combined with those of Continental Income Fund. The aggregate net assets of Continental Income Fund and Retirement Shares immediately before the acquisition were \$336,867 and \$232,156, respectively. The aggregate net assets of Continental Income Fund and Retirement Shares immediately following the acquisition were \$569,023 and \$0, respectively.

13. REGULATORY AND LITIGATION MATTERS

On July 24, 2006, WRIMCO, W&R and WRSCO (collectively, Waddell & Reed) reached a settlement with each of the SEC, the New York Attorney General (NYAG) and the Securities Commissioner of the State of Kansas to resolve proceedings brought by each regulator in connection with its investigation of frequent trading and market timing in certain Waddell & Reed Advisors Funds.

Under the terms of the SEC's cease-and desist order (SEC Order), pursuant to which Waddell & Reed neither admitted nor denied any of the findings contained therein, among other provisions Waddell & Reed has agreed to: pay \$40 million in disgorgement and \$10 million in civil money penalties; cease and desist from violations of the antifraud provisions and certain other provisions of the federal securities laws; maintain certain compliance and ethics oversight structures; retain an independent consultant to periodically review Waddell & Reed's supervisory, compliance, control and other policies and procedures; and retain an independent distribution consultant (described below). According to the SEC Order, the SEC found that some market timers made profits in some of the

Waddell & Reed Advisors Funds, and that this may have caused some dilution in those Funds. Also, the SEC found that Waddell & Reed failed to make certain disclosures to the Waddell & Reed Advisors Funds' Boards of Directors (now Trustees) and shareholders regarding the market timing activity and Waddell & Reed's acceptance of service fees from some market timers.

The Assurance of Discontinuance with the NYAG (NYAG Settlement), pursuant to which Waddell & Reed neither admitted nor denied any of the findings contained therein, among its conditions requires that Waddell & Reed: reduce the aggregate investment management fees paid by certain of the Waddell & Reed Advisors Funds and by certain of the Ivy Funds Variable Insurance Portfolios, formerly W&R Target Funds, Inc. (the Funds) by \$5 million per year for five years, for a projected total of \$25 million in investment management fee reductions; bear the costs of an independent fee consultant to be retained by the Funds to review and consult regarding the Funds' investment management fee arrangements; and make additional investment management fee-related disclosures to Fund shareholders. The NYAG Settlement also effectively requires that the Funds implement certain governance measures designed to maintain the independence of the Funds' Boards of Directors (now Trustees) and appoint an independent compliance consultant responsible for monitoring the Funds' and WRIMCO's compliance with applicable laws.

The consent order issued by the Securities Commissioner of the State of Kansas (Kansas Order), pursuant to which Waddell & Reed neither admitted nor denied any of the findings contained therein, required Waddell & Reed to pay a fine of \$2 million to the Office of the Commissioner.

The SEC Order further requires that the \$50 million in settlement amounts described above will be distributed in accordance with a distribution plan developed by an independent distribution consultant, in consultation with Waddell & Reed, and that is agreed to by the SEC staff and the Funds' Disinterested Directors (now Trustees). The SEC Order requires that the independent distribution consultant develop a methodology and distribution plan pursuant to which Fund shareholders shall receive their proportionate share of losses, if any, suffered by the Funds due to market timing. Therefore, it is not currently possible to specify which particular Fund shareholders or groups of Fund shareholders will receive distributions of those settlement monies or in what proportion and amounts.

The foregoing is only a summary of the SEC Order, NYAG Settlement and Kansas Order. A copy of the SEC Order is available on the SEC's website at www.sec.gov. A copy of the SEC Order, NYAG Settlement and Kansas Order is available as part of the Waddell & Reed Financial, Inc. Form 8-K as filed on July 24, 2006.

In addition, pursuant to the terms of agreement in the dismissal of separate litigation, Waddell & Reed has also agreed to extend the reduction in the aggregate investment management fees paid by the Funds, as described above, for an additional five years.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM Waddell & Reed Advisors Funds

To the Shareholders and Board of Trustees of Waddell & Reed Advisors Funds:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Waddell & Reed Advisors Accumulative Fund, Waddell & Reed Advisors Asset Strategy Fund, Waddell & Reed Advisors Continental Income Fund, Waddell & Reed Advisors Core Investment Fund, Waddell & Reed Advisors Dividend Opportunities Fund, Waddell & Reed Advisors Energy Fund, Waddell & Reed Advisors International Growth Fund, Waddell & Reed Advisors New Concepts Fund, Waddell & Reed Advisors Science and Technology Fund, Waddell & Reed Advisors Small Cap Fund, Waddell & Reed Advisors Tax-Managed Equity Fund, Waddell & Reed Advisors Value Fund, and Waddell & Reed Advisors Vanguard Fund, thirteen of the series constituting Waddell & Reed Advisors Funds (the "Trust"), as of June 30, 2010, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the periods presented. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Trust is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of June 30, 2010, by correspondence with the custodian and brokers; where replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the series constituting Waddell & Reed Advisors Funds as of June 30, 2010, the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP Kansas City, Missouri August 18, 2010

Waddell & Reed Advisors Funds

The Funds hereby designate the following amounts of dividends paid from net ordinary income as dividends qualifying for the 70% dividends received deduction for corporations or as qualified dividend income for individuals for the tax period ended June 30, 2010:

	Dividends Received Deduction for Corporations	Qualified Dividend Income for Individuals
Accumulative Fund	\$5,518,603	\$ 5,518,603
Asset Strategy Fund	8,500,266	10,852,675
Continental Income Fund	6,502,206	6,502,206
Core Investment Fund	9,109,449	9,109,449
Dividend Opportunities Fund	6,029,696	6,029,696

New Concepts Fund	_	_
Science and Technology Fund	_	_
Small Cap Fund	_	_
Tax-Managed Equity Fund	114,387	114,387
Value Fund	2,807,438	2,807,438
Vanguard Fund	4,364,500	4,364,500

The Funds hereby designate the following amounts as distributions of long-term capital gains:

\$ —	_
_	_
_	_
_	_
_	_
_	_
_	_
_	_
9,697,921	l
_	_
_	_
_	_
_	-
	\$ 9,697,92

Shareholders are advised to consult with their tax advisors concerning the tax treatment of dividends and distributions from all the Funds.

Internal Revenue Code regulations permit each qualifying Fund to elect to pass through a foreign tax credit to shareholders with respect to foreign taxes paid by the Fund. Each Fund elected to pass the following amounts of creditable foreign taxes through to their shareholders:

	Foreign Tax Credit	Foreign Derived Income
Accumulative Fund	\$ —	\$ —
Asset Strategy Fund	3,867,361	38,815,381
Continental Income Fund	_	_
Core Investment Fund	_	_

Energy Fund	_	_
International Growth Fund	1,029,782	13,428,008
New Concepts Fund	_	_
Science and Technology Fund	_	_
Small Cap Fund	_	_
Tax-Managed Equity Fund	_	_
Value Fund	_	_
Vanguard Fund	_	_

The tax status of dividends paid and the pass-through of foreign taxes paid will be reported to you on Form 1099-DIV after the close of the applicable calendar year.

BOARD OF TRUSTEES AND OFFICERS Waddell & Reed Advisors Funds

Each of the individuals listed below serves as a trustee for the Trust (20 portfolios), Ivy Funds Variable Insurance Portfolios (24 portfolios) and Waddell & Reed InvestEd Portfolios (3 portfolios) (collectively, the Advisors Fund Complex). The Advisors Fund Complex, together with the Ivy Family of Funds, comprises the Waddell & Reed/Ivy Fund Complex (Fund Complex). The Ivy Family of Funds consists of the portfolios in the Ivy Funds (33 portfolios). Jarold Boettcher, Joseph Harroz, Jr., Henry J. Herrmann and Eleanor B. Schwartz also serve as trustees of each of the funds in the Ivy Family of Funds.

Board members who are not "interested persons" of the Funds as defined in Section 2(a)(19) of the 1940 Act (Disinterested Trustees) constitute at least 75% of the Board.

David P. Gardner serves as the Independent Chairman of the Fund's Board and of the board of trustees of the other funds in the Advisors Fund Complex. Subject to the Trustee Emeritus and Retirement Policy, a Trustee serves until his of her successor is elected and qualified or until his or her earlier death, resignation or removal.

ADDITIONAL INFORMATION ABOUT TRUSTEES

The Statement of Additional Information (SAI) for the Trust includes additional information about the Trust's trustees. The SAI is available without charge, upon request, by calling 1.888.WADDELL. It is also available on the Waddell & Reed website, www.waddell.com.

^{*}Each Trustee became a Trustee in 2009, as reflected in the first date shown. The second date shows when the Trustee first became a director of one or more of the funds that are the predecessors to current funds within the Advisors Fund Complex.

INTERESTED TRUSTEES

Messrs. Avery and Herrmann are "interested" by virtue of their current or former engagement as officers of Waddell & Reed Financial, Inc. (WDR) or its wholly owned subsidiaries, including the Fund's investment manager, Waddell & Reed Investment Management Company (WRIMCO), the Fund's principal underwriter, Waddell & Reed, Inc. (Waddell & Reed), and the Fund's shareholder servicing and accounting services agent, Waddell & Reed Services Company, doing business as WI Services Company (WISC), as well as by virtue of their personal ownership in shares of WDR. Mr. Hechler could be determined to be an interested Trustee if a prior business relationship with Waddell & Reed were deemed material. Effective July 1, 2010, Mr. Hechler will begin to serve as a Disinterested Trustee of each of the Funds with fiscal years ending June 30 and, effective October 1, 2010, as a Disinterested Trustee of each of the Funds with fiscal years ending September 30.

ANNUAL PRIVACY NOTICE Waddell & Reed Advisors Funds

Waddell & Reed, Inc., the Waddell & Reed Advisors Funds, the Ivy Funds Variable Insurance Portfolios and the Waddell & Reed InvestEd Portfolios ("Waddell & Reed") are committed to ensuring their clients have access to a broad range of products and services to help them achieve their personal financial goals. Accurate information lies at the heart of our pledge to provide these products and services, and we strive to protect your personal nonpublic information. In the course of doing business with Waddell & Reed, clients are requested to share financial information and they may be asked to provide other personal details. Clients can be assured that Waddell & Reed is diligent in its efforts to keep such information confidential.

Recognition of a Client's Expectation of Privacy

At Waddell & Reed, we believe the confidentiality and protection of client information is one of our fundamental responsibilities. And while information is critical to providing quality service, we recognize that one of our most important assets is our clients' trust. Thus, the safekeeping of client information is a priority for Waddell & Reed.

Information Collected

In order to tailor available financial products to your specific needs, Waddell & Reed may request that you complete a variety of forms that require nonpublic personal information about your financial history and other personal details, including but not limited to, your name, address, social security number, assets, income and investments. Waddell & Reed may also gather information about your transactions with us, our affiliates and others.

Categories of Information that may be Disclosed

While Waddell & Reed may disclose information it collects from applications and other forms, as described above, we at Waddell & Reed also want to assure all of our clients that whenever information is used, it is done with discretion. The safeguarding of client information is an issue we take seriously.

Categories of Parties to whom we disclose nonpublic personal information

Waddell & Reed may disclose nonpublic personal information about you to selectively chosen financial service providers, whom we believe have valuable products or services that could benefit you. Whenever we do this, we carefully review the company and the product or service to make sure that it provides value to our clients. We share the minimum amount of information necessary for that company to offer its product or service. We may also share information with unaffiliated companies that assist us in providing our products and services to our clients; in the normal course of our business (for example, with consumer reporting agencies and government agencies); when legally required or permitted in connection with fraud investigations and litigation; and at the request or with the permission of a client.

In addition, Waddell & Reed, Inc. has entered into a Protocol with a number of other brokerage firms intended to further our clients' freedom of choice in connection with the movement of their financial advisors to new firms. In the event your account is maintained through Waddell & Reed, Inc. and your financial advisor leaves Waddell & Reed to join a firm that has likewise entered the Protocol, Waddell & Reed may disclose your name, address and telephone number to the departed advisor's new firm.

Opt Out Right

If you prefer that we not disclose nonpublic personal information about you to nonaffiliated third parties, you may opt out of those disclosures; that is, you may direct us not to make those disclosures (other than disclosures permitted by law). If you wish to opt out of disclosures to nonaffiliated third parties, you may make this request in writing to: Waddell & Reed, Attn: Opt Out Notices, P.O. Box 29220, Shawnee Mission, KS 66201, or you may call 1.888.WADDELL and a Client Services Representative will assist you.

Confidentiality and Security

We restrict access to nonpublic personal information about you to those employees who need to know that information to provide products and services to you. We maintain physical, electronic, and procedural safeguards that comply with federal standards to guard your nonpublic personal information. If you decide to close your account(s) or become an inactive client, we will adhere to the privacy policies and practices as described in this notice.

PROXY VOTING INFORMATION Waddell & Reed Advisors Funds

Proxy Voting Guidelines

A description of the policies and procedures Waddell & Reed Advisors Funds uses to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling 800.777.6472 and (ii) on the Securities and Exchange Commission's (SEC) website at www.sec.gov.

Proxy Voting Records

Information regarding how each Fund voted proxies relating to portfolio securities during the most recent 12 month period ending June 30 is available on Form N-PX through Waddell & Reed's website at www.waddell.com and on the SEC's website at www.sec.gov.

QUARTERLY PORTFOLIO SCHEDULE INFORMATION Waddell & Reed Advisors Funds

A complete schedule of portfolio holdings for the first and third quarters of each fiscal year is filed with the Securities and Exchange Commission (SEC) on the Trust's Form N-Q. This form may be obtained in the following ways:

- On the SEC's website at www.sec.gov.
- For review and copy at the SEC's Public Reference Room in Washington, DC. Information on the operations of the Public Reference Room may be obtained by calling 1.800.SEC.0330.
- On Waddell & Reed's website at www.waddell.com.

HOUSEHOLDING NOTICE Waddell & Reed Advisors Funds

If you currently receive one copy of the shareholder reports and prospectus for your household (even if more than one person in your household owns shares of the Trust) and you would prefer to receive separate shareholder reports and prospectuses for each account holder living at your address, you can do either of the following:

Fax your request to 800.532.2749.

Write to us at the address listed on the back cover.

Please list each account for which you would like to receive separate shareholder reports and prospectus mailings. We will resume sending separate documents within 30 days of receiving your request.

TO ALL TRADITIONAL IRA PLANHOLDERS: Waddell & Reed Advisors Funds

As required by law, we are hereby providing notice to you that income tax may be withheld automatically from any distribution or withdrawal from a traditional IRA. A Fund is generally required to withhold taxes unless you make a written election not to have taxes withheld. The election may be made on the distribution/withdrawal form provided by Waddell & Reed, Inc. which can be obtained from your Waddell & Reed representative or by submitting Internal Revenue Service Form W–4P. Once made, an election can be revoked by providing written notice to Waddell & Reed, Inc. If you elect not to have tax withheld you may be required to make payments of estimated tax. Penalties may be imposed by the IRS if withholding and estimated tax payments are not adequate.
